- Sales, operating profit, and ordinary profit all increased year-on-year.
- Operating margin was 13.8%, an increase of 0.6% year-on-year.
- Quarterly profit attributable to owners of the parent was less than the previous year due to the effect of the extraordinary gain on the sale of Jafco stock (18.8 billion yen) recorded that year. As a result, quarterly profit attributable to owners of the parent was down by about 10 billion yen.

## Highlights of Consolidated Financial Results <1H>

### ■ Comparison with announced forecasts on April 26

- Sales and operating profit both exceeded the announced forecast for the first half of the year, and are progressing in line with the forecast for the year.

## Key Factors in Financial Results for 2Q FY March 2019

### ● Higher income with +9.2% in sales

- DX-related business expanded, mainly in Consulting and Industrial IT Solutions, and profitability improved due to growth in Insurance.
- Overseas business grew, mainly in Australia.

### ● +13.8% in operating profit

- Increased earnings in Consulting, Industrial IT Solutions, and Insurance due to business growth and other factors.
- Profitability improvements in Australia contributed to increased profit, thanks to Australian PMI growth and securing of large-scale projects.

As we steadily advanced toward achieving the medium-term management plan (2016-2018), we also made good progress in preparing projects and producing results in growth areas for V2022.

- The revenue increase in consulting due to strong performance in both management and systems consulting domestically showed growth of over 15% even after excluding the effects of M&A in Australia (around 3.5 billion yen).
  - \* Sales in Australia were around 3.5 billion yen (zero the previous year)
- In financial IT solutions, revenues from business with securities companies decreased, mainly with Nomura Holdings, but performance in insurance was strong. Part of the implementation of the Bestway shared online service for banking was classified as other financial, etc., so performance was strong in both banking and other financial, etc., resulting in about the same overall year-on-year numbers for the segment.
- Industrial IT solutions grew more than 10% year-on-year even after subtracting the effects of M&A in Australia (around 7 billion yen) as the domestic business was propelled by e-commerce site builds (explained later) resulting from the trend toward D2C.
  - \* Sales in Australia were around 15 billion yen (8 billion yen the previous year)
- IT infrastructure services showed a revenue increase due to more AI- and digital workplace-related projects, and more business in information security.

- In securities, sales were particularly lower. Sales to Nomura Holdings decreased by 8.2 billion yen year-on-year. The past shows a tendency for more projects in the second half than the first, but with an overall decrease from the level of the previous year we forecast we expect sales for the year in the 60 billions of yen.
- Sales to Seven and I Holdings remain strong, particularly in distribution.
- Overseas external sales increased, mainly in Australia.

## Segment Performance Results <1H>

7

- In consulting, profits increased mainly due to more projects both domestically and overseas. Excluding the effects of M&A in Australia, profit margin is the highest it has ever been.
- In industrial IT solutions, profit increased thanks to more projects domestically, as well as improved profitability in Australia (+ roughly just over 1 billion yen). Excluding the effects of M&A in Australia, performance was strong and profit margin was higher than financial IT solutions.
- In financial IT solutions, profit increased as resources were shifted to industrial IT solutions in response to the decrease in the number of projects for securities.

## Analysis of increase and decrease factors

- Main factors for increases and decreases in external sales and operating profit by segment are as follows.

(Key) (+) Increase factors, (-) Decrease factors

Segment		External sales	Operating profit
Consulting		(+) More consulting projects inside and outside Japan (+) Impact from M&A in Australia (approx. 3.5 billion yen)	(+) Effect of increased income from consulting projects inside and outside Japan
Financial IT Solutions	Securities	(-) Decrease in business with Nomura Holdings (-) Decreases in business with other securities companies	(+) Effect of increased income from business with insurance (-) Impact of decreased income from business with securities
	Insurance	(+) Increases in business with life and non-life insurance	
	Banking		
	Other financial, etc.	(+) Increases in business with multiple main clients	
Industrial IT Solutions	Distribution	(+) Increases with multiple clients including Seven & i Holdings	(+) Effect of increased income from multiple major clients (+) Improved profitability in Australia (approx. 1 billion yen)
	Manufacturing & services, etc.	(+) Increases with multiple major clients (+) Impact from M&A in Australia (approx. 7 billion yen)	
IT Platform Services			
Common between segments			(+) No costs to move into new offices which arose the previous year (approx. 1 billion yen)

## Sales by Service <1H>

(JPY million)

	2Q FY Mar. 2018	2Q FY Mar. 2019	Diff.	YoY Change
Consulting Services	31,981	43,720	11,738	36.7%
System Development & System Application Sales	63,815	68,940	5,124	8.0%
System Management & Operation Services	117,155	120,451	3,296	2.8%
Product Sales	7,262	7,295	33	0.5%
<b>Total</b>	<b>220,214</b>	<b>240,407</b>	<b>20,192</b>	<b>9.2%</b>

- In consulting services, external sales increased even after excluding the impact of M&A in Australia (around 5 billion yen). In addition to the strong performance in the consulting segment, this included lots of upstream system projects coming from outside the consulting segment, and we see this as a leading indicator of sales for development projects in the future.
  - \* External sales in Australia were around 7.5 billion yen (2.5 billion yen the previous year)
- Development and product sales increased, mainly to the insurance, distribution, and service industries.
- In system management and operation services, selling off DSB as a subsidiary the previous year had a downward impact on sales, but the impact of M&A in Australia (around 6 billion yen) resulted in an overall increase.
  - \* Sales in Australia were around 10 billion yen (4 billion yen the previous year)

## Consolidated P/L Highlight <1H>

### ➤ Reason for increase in cost of sales

The main reason was the increase in outsourcing costs that accompanied the acquisition of SMS in Australia.

- Adding in order backlog (orders expected to be recorded as sales this year) at the end of the first half, sales for the first half were 405.3 billion yen. Progress in sales for the first half was in line with the plan, but in the second half more efforts will have to be dedicated to securing orders to reach the sales forecast of 510 billion yen for the year.

#### ● Domestic

- Consulting continued to have strong numbers in the first half.
- Financial IT solutions decreased due to less projects for securities. In the second half we will build up orders mainly for insurance, banking, and asset management where performance is currently strong.
- Industrial IT solutions will keep up the same strong performance, maintaining the same pace as the first half in which orders increased dramatically.

#### ● Overseas

- The decrease was roughly half from Australia and half from North America.
- Half the decrease in Australia was due to the impact of a weaker exchange rate. The decrease from North America was the impact of selecting ordered projects to deal with a certain amount of unprofitable projects at Brierley+Partners. The actions for dealing with these unprofitable projects are concentrated in the first half, and we believe the numbers will recover in the second half.

## Supporting IT investments that transform business models, starting with strategy proposals

### Expanding D2C-related investment in response to the threat from Platform companies

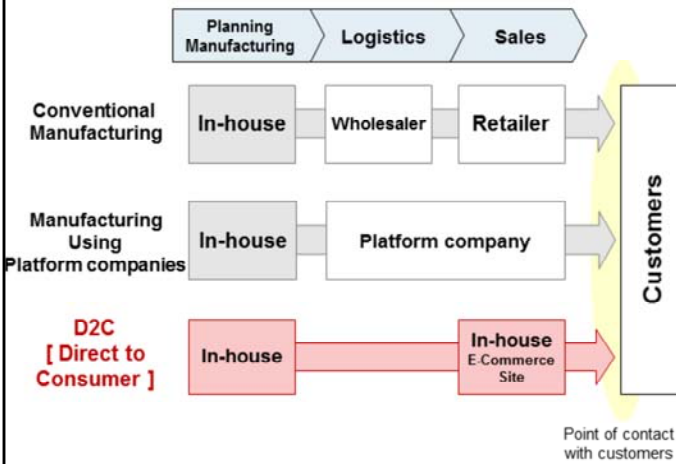

- Possess own e-commerce site, and **build own customer experience (CX)** while **accumulating and analyzing customer data**
- In retail also there is a stronger movement aiming to **use digital power for more sophisticated contact points with customers**

### Example:

### Retail Company A

#### Omni-channel retailing project

- Initially core systems support, expanded e-commerce support starting with proposal of an omnichannel strategy, and have now turned that into comprehensive support including stores and operations

### EC site

Improving points of contact with customers through differentiation of product services

- Personalization through Digital Marketing
- Point systems, building ecosystems through partnerships with other companies, etc.
- Differentiation through expert product knowledge and after-sales service

### Stores

Improving CX through collaboration with in-store shopping

- Mutual customer attraction between Stores and EC sites
- In-store utilization of smartphones
- Common inventory between Stores and EC sites (more effective logistics, reduced delivery times, less lost sales opportunities)

## Developing into a strategic partner that supports advanced IT investment, with our long track record as a springboard

**Example:**

### Life Insurance Company B

System platform project in public cloud environment

- Built trust through long track record in application development projects
- In recent years we expanded into support for IT strategy considerations, and secured an order to perform a Microsoft Azure\* build for part of the platform for a customer center system, the next-generation customer-facing platform in core systems

**Example:**

### Internet Banking Company C

Next generation system renewal project

- Earned trust by building a track record in small-scale projects
- Gained recognition for our knowledge of the track records and operations of other companies in the fields of core systems and Internet banking, then secured an order for a large next-generation system renewal project

**Main initiatives in the past**

**Recent achievement**

Track record in application projects, new products, and system reforms

Support for IT strategy plans by CIO (also involved in plans for moving to cloud)

Expertise at building system platforms in public cloud environment

**Secured order for project to build public cloud platform**

(Actual version now in operation)

**Main initiatives in the past**

**Recent achievement**

Strengthen relationships through personnel exchange, etc.

Build a track record in small-scale projects (high quality)

Expertise and track record in the field of Internet banking

**Secured order for next-generation system renewal project**

(have started on design and development)

Since progress in the first half is in line with the plan and business conditions are good, sales have not changed overall. However, on a per-segment basis we have made the following adjustments.

- We made a partial adjustment to our arrangement of segments according to our management approach, and starting October 1 the “other” segment, which had been comprised mainly of certain subsidiaries, has been integrated into industrial IT solutions. The goal of this action is to strengthen synergies between businesses.
- While we do expect a second half recovery in projects for securities, which has fallen short of the first half plan, we will not likely achieve the original forecast for the year in this area. However, we expect continued strong performance with insurance and in industrial IT solutions which both exceeded their first half plan, and we are forecasting them to beat their original forecasts by 3 billion yen and 8 billion yen respectively.

\* The “other” segment ... NRI Netcom, NRI Social Information System Services, and NRI Cyber Patent belonged to this segment

## ● Domestic

Strong performance in consulting continued, and orders increased

- In financial IT solutions securities decreased, but orders for insurance and banking were brisk.
- Orders increased dramatically in industrial IT solutions in the first half, and this brisk level of business will be maintained in the second half.

## ● Overseas

- Australia accounts for around 8 billion yen of the decrease, which includes the order backlog for SMS (10 billion yen) which was incorporated all at once at the end of 2Q last year, but these are technical causes. Aside from this, there was also the impact of selecting ordered projects to deal with a certain amount of unprofitable projects at Brierley+Partners.
