

Nomura Research Institute Group

## NEWS RELEASE

1/4/2022

Shingo Konomoto

Chairman and President & CEO, Representative Director, Member of the Board  
Nomura Research Institute, Ltd.

### **Wishing Everyone a Happy and Prosperous New Year!**

As we enter 2022, I would like to wish everyone a Happy New Year from NRI Group.

2021 was a year where corporations of all kinds clarified how they will confront COVID-19 under various ongoing restrictions to their business. Furthermore, questions like how to confront climate change and other social issues, and, how to create social value in addition to economic value loom as the existence and role of corporations is brought strongly into question.

NRI Group has declared our commitment to sustainable management and our policy of commitment to creating new social value under our current “Vision2022” Medium-Term Management Plan. With this, our strategic offerings do not stop at digital transformation (DX1.0 & DX2.0) for corporations and industry but extend to using digital transformation to realize stronger overall social well-being - DX 3.0 as we like to call it. And, this year we have begun accelerating our efforts in DX 3.0 at full scale.

2022 is the final year for NRI Group to complete our mission under Vision2022. We will use our combined consulting and solutions power to the fullest to deliver unique NRI solutions for the pressing social issues the world is facing, and we will continue in our unwavering pursuit of creating social value with our clients.
