Sustainability Policy

Sustainability management policy

NRI sustainability management policy

NRI provides support to clients to solve social challenges in their business and wishes to become a company that co-creates social values together with the customers.

This wish has resulted in NRI to approve and participate in the United Nations Global Compact (UNGC), the Task Force on Climate-related Financial Disclosures (TCFD) and others.

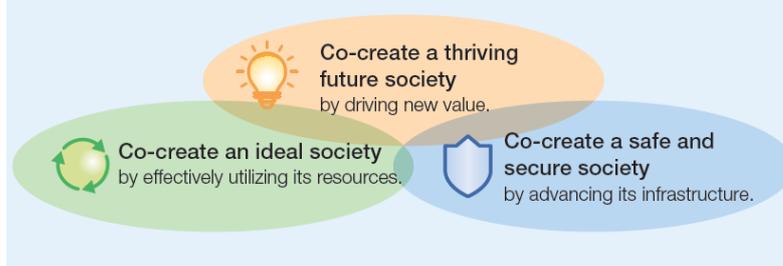

"NRI Group Medium-Term Management Plan (2019 – 2022)" states the "solving of social challenges through co-creation of values" and has set to promote the co-creation of three social values, "Co-create a thriving future society by driving new value", "Co-create an ideal society by effectively utilizing its resources", and "Co-create a safe and secure society by advancing its infrastructure" at its core to promote business.

To be able to be trusted by the society from now on and to respond to such expectations, we must ride the tide of new technology ahead of time while making changes to ourselves, and promote business that will lead to solving the challenges in future society to contribute to creating a sustainable future society, and fulfil our social responsibility.

Furthermore, we will listen sincerely to the voices of diversified stakeholders, both domestic and overseas, and control our own actions.

NRI Group Sustainability Management

•Solving social issues through value co-creation (CSV)

•Materiality for sustainable growth

Reduction of environmental impact for preserving global environment

Provision of opportunities for all kinds of professionals to take on challenge

Compliance with laws, regulations and risk management to increase trust from society

Management of the informationsystems that form social infrastructure

■ Sustainability Policy

▶ Sustainability management structure

Sustainability management structure

NRI has established the "NRI Value Co-Creation Promotion Committee" and "Sustainability Activities Committee" as president's special mission for promoting sustainability, and based on the investigations and discussions in both committees, makes recommendations to the management meeting.

[Organizational chart]

▶ Participation in the initiatives

Participation in the initiatives

- United Nations Global Compact (UNGC)
- Japan Climate Initiative (JCI)
- World Business Council for Sustainable Development (WBCSD)
- Task Force on Climate-related Financial Disclosures (TCFD)
- Science Based Targets initiative (SBTi)
- Renewable Electricity 100% (RE100)
- Business Ambition for 1.5°C
- Japan Business Federation (Keidanren) "Charter of Corporate Behavior"

► Our stakeholders

Our stakeholders

The NRI Group's stakeholders range from a core of "Customers," "Employees/Families," "Shareholders/Investors," and "Business Partners," to also include "Consumers," "Media," "Local Communities," "Industry Organizations / Industry Peers," "Government," "Education and Research Institutes," "Students," and "NGO/NPOs."

We will continue to create a better future society and build stronger relationships of trust with society, all the while maintaining close communication tailored to the peculiarities of each stakeholder.

► Stakeholder dialogue

Stakeholder dialogue

The NRI Group values the opportunities in its daily business activities to listen to the opinions of and communicate with stakeholders in a variety of ways.

Furthermore, in addition to our daily discussions, we engage in dialogue with opinion-maker and rule-maker experts to understand global sustainability trends and reflect them in management strategies and risk management.

In FY2017, a dialogue on the theme of ESG investment was held in London, and another on the theme of business and human rights was held in Tokyo, and we received valuable feedback on how ESG issues such as the problem of "digital rights" in the ICT industry should be integrated into NRI's business activities.

In FY2018, we visited the World Business Council for Sustainable Development (WBCSD), an international NPO promoting SDGs in Geneva, Switzerland, and also visited the international ESG evaluation organization RobecoSAM in Zurich, and held a second dialogue.

We exchanged opinions on what ESG investors want from companies and what we should do as companies toward SDGs.

In addition, we have held ESG briefing sessions every year since this year to introduce sustainability management and specific ESG initiatives, and received valuable feedback from stakeholders regarding "NRI-like value co-creation."

IN FY2019, NRI held its third overseas stakeholder dialogue in Paris, France.

We visited BNP Paribas Asset Management, the asset management division of BNP Paribas Group, a world-leading financial institution in the field of sustainable finance, and Vigeo Eiris, an international ESG rating agency.

In this dialogue, experts from each company and several NRI employees exchanged opinions on the "tide of international sustainable finance" and "evaluation of the company's efforts toward the SDGs."

Dialogues are attended by the NRI Group's Senior Corporate Managing Director, who is responsible for sustainability, and the system is one that directly reflects dialogue results in strengthening governance and management.

Materiality

Materiality

Materiality

NRI's 15 material issues (materiality) were identified based on international standards and guideline categories from ISO 26000, GRI* G4 Guidelines, Dow Jones Sustainability Indices (DJSI), and the SASB (United States Sustainability Accounting Standards Board), and the United Nations Global Compact.

Provision of NRI quality to support safe and secure information society

- Information security / system management
- Access to information society

Provision of opportunities for all kinds of professionals to take on challenges

- Diversity of human resources
- Dialogue with society
- Communication with customers
- Sound hiring practices and labor-management relations
- Respect for human rights

Compliance with laws, regulations and risk management to increase trust from society

- Strengthening corporate governance
- Risk/crisis management
- Prevention of overseas
- Appropriate disclosure of information to customers

Creation of a future, low environmental impact society

- Response on climate change
- Consumption of sustainable energy
- Recognize responsibility and protect the environment
- Show consideration for environments in our supply chain

* GRI: Global Reporting Initiative

Identification process of materiality

Step1 Clarification of issue elements based on international standards

Clarify elements that may be issues to be considered for sustainable growth based on guidelines for international standards, etc., and prepare an exhaustive list.

Step2 Identification of materiality

Extract and identify highly important elements clarified from management (horizontal axis) and external stakeholders (vertical axis) perspectives.

Step3 Hearings with experts and management review

Adjust highly material elements based on the opinions from external experts, securing the reliability and objectivity of the elements, and identify through management review.

Materiality

▶ Key performance indicators of materiality

Creation of a future, low environmental impact society

Target material issue

Response on climate change

Long-term target

By FY2030, NRI Group will reduce greenhouse gas by 55% compared to FY2013. (Scope1+2).

Target year

FY2030

progress

FY2019: Greenhouse gas emissions reduction rate 43.8% (compared to FY2013)

Provision of opportunities for all kinds of professionals to take on challenges

Target material issue

Diversity of human resources

Long-term target

1. Increase the female manager ratio to at least 8.5% by the end of FY2022 (add more than 100 female managers)
2. Make women's recruitment rate over 30%
3. Conduct awareness raising regarding diversity management for managers

Target year

FY2022

progress

FY2019: Female managerial ratio 7.1%, female recruitment ratio 28.2%

Provision of NRI quality to support safe and secure information society

Target material issue

Information security / system management

Long-term target

NRI manages the result of the security review of the client system and corrective situation, and the audit result and corrective situation for each business base and business partner as indicator.

Target year

Continue to work toward the yearly goals set each fiscal year.

progress

FY2019: There were no information system incidents that had serious financial and social impacts.

▶ Structure of disclosure of information

Information disclosure system

Integrated report (booklet and PDF)	An overall picture of NRI's corporate value creation activities is explained in concise and clear manner.
ESG Databook (PDF)	We disclose in detail non-financial information relating to the Environmental (E), Society (S), and Governance (G).
Sustainability Book (booklet and PDF)	An overview of the year's sustainability promotion activities is explained in an easily understood manner.
Website	Information about the NRI Group, shareholder and investor information, CSR information, and other information are disclosed in detail.

■ Corporate Governance - Management Approach

Material issues of NRI related to this management approach

"Strengthening of corporate governance" and "Dialogue with civil society"

NRI's approach to material issues

NRI works to enhance corporate governance in accordance with the basic approach outlined below, based on the recognition that corporate governance consists of mechanisms for transparent, fair, timely, and accurate decisionmaking based on the perspective of stakeholders, including society, customers, employees, business partners, and shareholders.

1. Cooperation with stakeholders

NRI respects the interests of stakeholders and cooperates with them in an appropriate manner. In particular, with regard to shareholders, NRI takes the proper measures so that rights are substantially secured, in addition to ensuring substantial equality.

2. Information disclosure and communication

NRI discloses information as stipulated by laws and by the regulations of the Tokyo Stock Exchange, and information that assists its stakeholders in understanding NRI and its operations properly, in a timely, accurate, and fair manner, to secure transparency as well as to engage in constructive dialogue with its shareholders.

3. Corporate governance system

NRI is strengthening its management monitoring functions based on the Audit & Supervisory Board System through the appointment of Independent Directors and Independent Audit & Supervisory Board Members, as well as the establishment of bodies that are mainly composed of Independent Directors appointed to advise the Board of Directors.

NRI have made the NRI Corporate Governance Guidelines public to outline our basic approach and action policy regarding corporate governance.

Priority activities / Medium- to long-term targets

In the domestic market, the NRI Group has grown through establishing a customer base in the financial and retail industries and providing a business platform in the financial field. In the global market, we have grown through the response to Japanese companies' globalization and M&A mainly in Australia.

On the other hand, client companies are increasing IT investment related to digital transformation (hereinafter referred to as "DX"), and are rapidly progressing from the stage of transforming business processes to the stage of transforming business models themselves.

In order to realize further growth in the future, the NRI Group needs to enhance its competitive advantage in existing business areas both at home and abroad, establish its position as a trusted partner in the DX area, and enlarge transactions with customers.

To that end, it is necessary to secure personnel who will promote the DX business and the global business, and it is important to strengthen recruitment and development.

Although the percentage of consolidated overseas sales is about 10%, NRI's foreign ownership ratio is 20% or more and less than 30%, and the NRI Group's overseas workforce ratio has risen to 28%.

In light of the above, we are promoting the enhancement of corporate governance from the following perspectives.

Progress / Achievements / Challenges

We improved transparency and independence by increasing the number of independent outside directors from two to three in 2015, and began evaluating the effectiveness of the Board of Directors in 2016.

In 2017, the company established a Nomination Committee with independent outside directors as the principal members, and also changed the principal members of the Compensation Committee from outside experts to independent outside directors.

In terms of sustainability, we established a Sustainability Activities Committee in 2017 to create a system to incorporate a sustainability perspective in management decision making and supervision.

As for the diversity and universality of global governance, we are proceeding to share the corporate philosophy of NRI, along with the group's corporate behavior principles and standards of conduct, while at the same time respecting the corporate culture and climate of overseas subsidiaries that have newly joined the NRI Group.

Corporate Governance - Data

Corporate governance policy

Policy and objectives concerning the independence of the Board of Directors

NRI is strengthening its management monitoring functions based on the Audit & Supervisory Board System through the appointment of Independent Directors and Independent Audit & Supervisory Board Members, as well as the establishment of bodies that are mainly composed of Independent Directors appointed to advise the Board of Directors.

The Board of Directors has a well-balanced composition of non-executive directors, executive directors, and Outside Directors, which is intended to facilitate the realization of appropriate decision-making and oversight of the Board of Directors that take into consideration multiple perspectives, including the viewpoints of business execution, supervision, and outside parties.

NRI elects three Independent Directors in principle, or no less than two Independent Directors.

The independence of the Board of Directors is stipulated in Articles 11, 13, 17, 19, and 23 of the NRI Corporate Governance Guidelines.

Corporate governance structure

Corporate governance structure

Criteria and process for nomination of Members of the Board and Audit & Supervisory Board Members

Process for nomination of Members of the Board and Audit & Supervisory Board Members

The Board of Directors includes no more than 15 Members of the Board, taking into consideration of the balance and diversity of various factors, including experience in and knowledge of the Company's businesses, corporate management, IT technology, and corporate finances. This composition promotes the realization of supervision and appropriate decision-making from multiple perspectives by the Board of Directors.

To ensure the independence of the Audit & Supervisory Board, at least half of the Board members are composed of Outside Audit & Supervisory Board Members.

NRI elects at least two Independent Audit & Supervisory Board Members.

And at least one of the appointed Audit & Supervisory Board Members must have considerable knowledge of finance and accounting.

Criteria for nomination of Members of the Board and Audit & Supervisory Board Members

Candidates for Members of the Board must have extensive practical experience, high capabilities, understanding, and the ability to contribute to the enhancement of corporate value over the mid- to long-term in a manner consistent with the NRI's corporate philosophy.

Candidates for Audit & Supervisory Board members must have extensive practical experience, high capabilities, understanding, and can be expected to perform audits from a neutral and objective viewpoint and contribute to the maintenance of the soundness of management.

Corporate Governance - Data

Evaluations of the Board of Director's effectiveness

<p>1. Evaluation methods:</p> <ul style="list-style-type: none"> • Questionnaire targeting all Directors and Audit & Supervisory Board Members • Opinion exchange at the Independent Directors Meeting • Discussion at the board of directors meeting based on the results of the above questionnaire and opinion exchange <p>2. Results</p> <p>From the following points, it is evaluated that the effectiveness of the Board of Directors is generally secured.</p> <ul style="list-style-type: none"> • With three independent outside directors, we have a system in place to ensure appropriate decision-making and supervision based on the membership structure based on many experiences. • Each director fulfills his/her duties as a director by having an understanding of the management philosophy and management plan of the Company, and actively conducting deliberation based on his/her knowledge. • Free and open discussions and constructive discussions are held. • The Nomination Advisory Committee and the Compensation Advisory Committee have been properly discussed and evaluated as functioning effectively. <p>3. Challenges for further effectiveness</p> <ul style="list-style-type: none"> • Regarding the agenda for strategy promotion in the medium-term management plan (2019-2022), we will work to further improve the mode of discussion. Also devise for a well-balanced conference operation, such as further enhancing the discussion on group governance.

Corporate Governance - Data

Executive compensation

Executive compensation amounts	No. of eligible individuals (person)	unit	Total compensation	Basic compensation	Performance-linked compensation			
					Bonus	Stock options	Restricted stock-based compensation	Other
Members of the Board (Excluding Outside Members of the Board)	6	millions of yen	508	205	164	25	110	2
Audit & Supervisory Board Members (Excluding Outside Audit & Supervisory Board Members)	3	millions of yen	91	57	26	1	4	1
Outside Members of the Board and Outside Audit & Supervisory Board Members	6	millions of yen	110	96	13	–	–	0

Notes:

1. The above includes one auditor who retired at the end of the 53rd Ordinary General Meeting of Shareholders held on 20th June 2019.

In addition to the above, stock option costs related to officers who have retired in the past are recorded in the current fiscal year.

2. "Other" refers to contributions to the defined contribution pension plan and insurance premiums for casualty insurance.

Compensation amounts for each executive		Official position	unit	Total compensation	Basic compensation	Performance-linked compensation			
Name						Bonus	Stock options	Restricted stock-based compensation	Other
Shingo Konomoto	President & CEO	millions of yen	131	53	40	6	29	0	
Ayumu Ueno	Exec. Vice President	millions of yen	107	45	32	4	23	0	

Notes: Limited to those whose total amount of consolidated compensation is JPY 100 million or more.

Policy for determining the amount of compensation for Members of the Board and the calculation method

The maximum compensation total for Members of the Board: 1,000 millions of yen per annum (Although, this shall not include employee salaries of Members of the Board who concurrently serve as employees). Based on the Plan, the compensation provided for granting restricted stock to Eligible Members of the Board shall take the form of monetary compensation claims, Stock-based compensation as long-term incentives: within the limit of 120 million yen per annum, stock-based compensation as medium-term incentives: within the limit of 280 million yen per annum, and total of not more than 400 million yen per annum.

To improve transparency of directors' compensation and others, NRI has established the Compensation Committee, comprised mainly of Independent Directors, as an advisory body to the Board of Directors. The committee deliberates on the system and standards of executive compensation from the standpoint of fairness and transparency. Using the results of the committee's inquiries, the Board of Directors sets policies for the determination of compensation for Members of the Board and other matters.

The compensation system for Members of the Board is based on executive position, but in the interest of enhancing business results, the system emphasizes connections to business performance. The standards employed by the system have been set with reference to market standards and trends and other factors, with the goal of establishing standards appropriate for a leading company in the information services

a. Director compensation policy

- i. We will secure incentives that will motivate the achievement of mid- to long-term management goals in order to achieve a sustainable increase in corporate value with a highly performance-based compensation system.
- ii. Meet the standards required for a leading company in the information service industry.

b. Composition of compensation for directors

Compensation for directors (excluding outside directors) is a system system based on job title, and consists of basic compensation, bonuses, and stock-related compensation (hereinafter referred to as "compensation elements").

Considering the role of supervision and advice for the management of the Group based on an objective standpoint, only basic compensation will be paid to outside directors.

In order to establish a highly performance-based compensation system, emphasis is placed on bonuses^{*1} and stock-related compensation^{*2}.

The composition ratio of compensation elements will be linked to the consolidated performance of bonuses for a single year and stock-related compensation depending on the stock price at the time of grant.

The ratio of the components of the compensation of directors, etc. in FY2019 is "0.8" for the basic compensation, "1.1" for the stock-linked compensation, and performance-linked compensation for the fixed compensation of "1".

(Fixed compensation) Basic compensation 【1】	(Performance-based compensation) 【1.9】	
	(Short-term performance-based compensation) Bonus 【0.8】	(Medium- to long-term performance-based compensation) Stock-related compensation 【1.1】

- (Notes) 1. Calculated as the average value of directors (excluding outside directors, retired directors, and incumbent directors) for the FY2019.
2. Stock-related compensation uses the total amount of monetary compensation receivables that are invested in kind in exchange for restricted stock.

Corporate Governance - Data

(I) Basic compensation (Fixed compensation)
It is composed of a salary as a compensation according to the career and work history of each director, and a role-based salary based on the position and duties of each director during the term of office, and is paid as a fixed compensation for the performance of duties.

(II) Bonus
Director bonuses are positioned as short-term incentive remuneration for achieving medium- to long-term management goals, and operating profit, which is the most important performance indicator, is linked to performance index increase/decrease rate while taking into account non-operating profit/loss and extraordinary profit/loss. Decide the rate of change from the previous year.

$$\begin{array}{c}
 \boxed{\text{Amount of bonus payment for each director}} = \boxed{\text{Base year bonus } (\alpha)} \times \left[1 + \boxed{\text{Change rate of performance indicators } (\beta)} \right] \times \boxed{\text{Position points } (\gamma)} \\
 \leftarrow \text{Varies from 0\% to 200\%} \rightarrow
 \end{array}$$

- (α) Base year bonus
The amount of bonus paid by the president in the previous year.
- (β) Change rate of performance indicators
The final Change rate of performance indicators is decided by the Board of Directors after deliberation by the Compensation Advisory Committee.
- (γ) Position points
President and CEO set to 1.0, and other directors set points based on each position.

(III) Stock-related compensation (Stock compensation with transfer restrictions)
There are the following two types of restricted stock compensation for directors, excluding outside directors, for the purpose of providing medium- to long-term incentives for the sustainable improvement of our corporate value and promoting value sharing with shareholders.

Type	Transfer restriction period
Long-term incentive stock compensation	From the date of allocation until the retirement of officers of the Company or its subsidiaries
Medium-term incentive stock compensation	3 to 5 years from the date of allocation

CEO to employees pay ratio	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Compensation of the President & CEO	millions of yen	less than 100	104	113	115	131
Average employee salary of NRI	thousands	11,560	11,514	11,660	12,217	12,352
Ratio of compensation	ratio	n/a	9.0	9.7	9.4	10.6

Executive stock ownership requirements

Guidelines of Executive stock ownership

Based on the Stock Ownership Guidelines for Executive Officers, Members of the Board are expected to hold more than a certain number of shares of NRI's stock, in accordance with their respective positions.

■ Risk Management - Management Approach

Material issues of NRI related to this management approach

It is related to all materiality of 15, but in particular "Risk / crisis management"

NRI's approach to material issues

The NRI Group defines the possibility of detriment to the Group's capital due to an unforeseen circumstance that occurs in business operations, or something that prevents the preservation or improvement of enterprise value due to a phenomenon that hinders business operations as business operational risk.

These risks conform to the ERM framework (COSO Enterprise Risk Management-Integrated Framework) developed by the USA's COSO (The Committee of Sponsoring Organizations of the Treadway Commission), divided into the 11 categories of management strategy risk, business continuity risk, compliance risk, information security risk, systems impairment risk, project management risk, external outsourcing / procurement risk, subsidiaries / affiliate company risk, business resource risk, information disclosure risk, and reputational risk, and are subject to integrated management.

In recent years, we recognize that the response to risks of social issues such as climate change or human rights will have a major impact on the sustainable growth of the company over the medium to long term. The NRI Group will also respond to these ESG risks within the integrated risk management framework.

The NRI Group has appointed a Risk Management Director and established a Risk Management Supervisory Bureau in order to establish an internal controls system and aim for continual improvement. Furthermore, at the direction of the President & CEO, the Integrated Risk Management Committee has been established and conducts appropriate inspections of the status of the entire company's internal controls.

The Integrated Risk Management Committee reports several times a year to the Board of Directors. Supervisory bureaus have been established for each of the main risks that accompany business activities, and when necessary, deliberations take place at specialist meetings, with the supervisory bureaus taking measures for appropriate responses in collaboration with business departments.

Priority activities / Medium- to long-term targets

NRI annually inspects and assesses risk for the entire company, based on results from a company-wide monitoring of compliance with regulations as well as from internal audits, after which management sets priority themes to be tackled.

We strive to reinforce our business continuity plan (BCP) and disaster recovery (DR) measures by regularly monitoring risk countermeasures required for business continuity, targeting significant business and service lines.

[Priority themes for FY2019]

- (1) Continue proper management quality risks
- (2) Further strengthen the management of project risks
- (3) Improve the management preparedness of information security
- (4) Develop governance systems suitable to increasing globalization
- (5) Create comfortable working environment
- (6) Implement appropriate preparation for fulfilling our business continuity responsibilities

■ Risk Management - Management Approach

Progress / Achievements / Challenges

The items and results of the priority themes of the Integrated Risk Management Council for the FY2019.

- (1) Continue proper management quality risks
Prepared large-scale system failure response guidelines and conducted failure response drill, in preparation for critical system failure.
- (2) Further strengthen the management of project risks.
Continue the strengthening of checks at Proposal Estimation Review Committee in preparation in the event of unexpected unprofitable projects.
- (3) Improve the management preparedness of information security
Upgrading of CSIRT as response against cyber-attacks in the event of critical security failure occurrence.
- (4) Develop governance systems suitable to increasing globalization
Study governance methods for acquired subsidiaries and management risk response policies for each country.
- (5) Create comfortable working environment
Monitoring of labor conditions based on Labor Management Standard. Conducted response to the Act for Promotion of Work-style Reform.
- (6) Implement appropriate preparations for fulfilling our business continuity responsibilities
Conducted disaster drill assuming an earthquake.

■ Risk Management - Data

► Risk management system

Risk management system

NRI has established a basic policy for building an internal control system, while appointing a director in charge of risk management and setting up a department for supervising risk management. Furthermore, the Integrated Risk Management Committee has been established and conducts appropriate inspections of the status of the entire company's internal controls.

With regard to the main risks associated with business activities, we have established departments in charge of each risk, deliberate as necessary at expert meetings, and take appropriate measures in cooperation with the departments in charge.

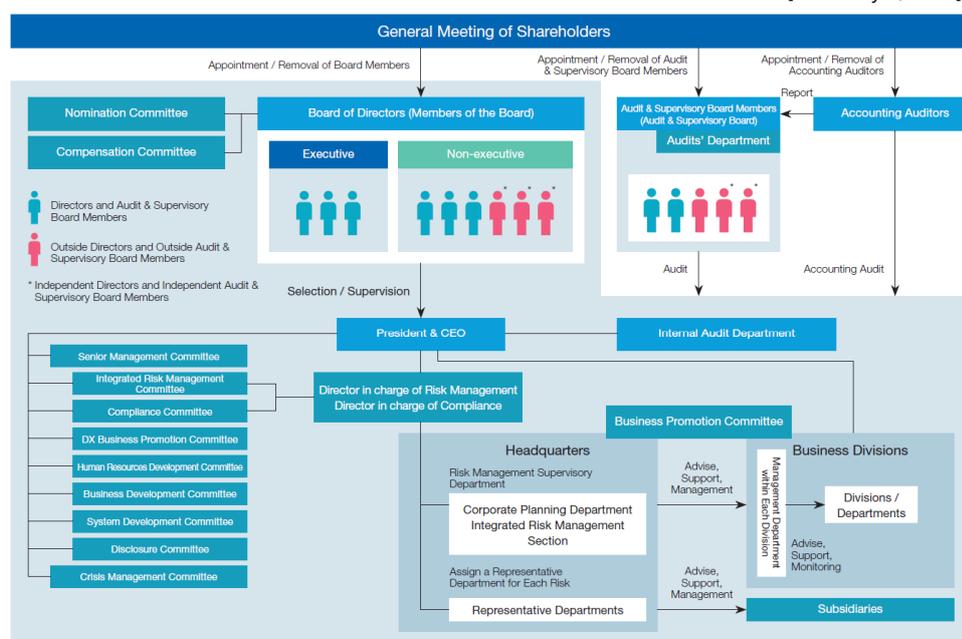

An internal audit department (21 employees) under the direct control of the president audits the effectiveness of the risk management system, the compliance system, and the system for streamlining the efficiency of directors' execution of duties.

The audit results are reported to the president and other directors, and when corrections or improvements are needed, the Risk Management Division, the representative department, and the business divisions work together to make improvements.

In addition, the internal audit department cooperates with the accounting auditor to regularly exchange opinions on the implementation plans and results of internal audits.

[Corporate governance structure]

[As of July 1, 2020]

Officer in charge

Yasuo Fukami
 Representative Director, Member of the Board,
 Senior Executive Managing Director in charge of Supervising of Corporate Administration*
 * Including risk management and compliance.

Responsible committee

Integrated Risk Management Committee

Independence of risk management function and involvement of the Board of Directors

In order to achieve overall optimization of risk management, a resolution of the board of directors established rules for risk management for the entire NRI Group, and has appointed a director in charge of risk management and setting up a department for supervising risk management. In addition, an Integrated Risk Management Committee has been established in order to deliberate on important matters related to risk management in the NRI Group based on the instructions of the President & CEO.

► Risk assessment

Risk assessment measures

The NRI Group has established, based on the instructions of the President & CEO, an Integrated Risk Management Committee in order to deliberate on important matters related to risk management. The Integrated Risk Management Committee monitors the major risks at the NRI Group, and after a comprehensive analysis, classifies them as either medium / long-term risks or short-term risks, which it then manages by comprehensively taking into account the importance of each risk and setting priority themes every year. The risk assessments and monitoring details are reported to the board of directors several times a year.

Risk items subject to risk management

- Strategy risk
- Business continuity risk
- Compliance risk
- Information security risk
- Systems impairment risk
- Project management risk
- External outsourcing / procurement risk
- Subsidiaries / affiliate company risk
- Business resource risk
- Information disclosure risk
- Reputational risk

Link Files	Internal Controls, Corporate Ethics and Compliance https://ir.nri.com/en/ir/library/report/main/08/teaserItems1/0/linkList/00/link/AR2020_view_all_e.pdf#page=82
	Business and Other Risks https://www.nri.com/en/company/risk

► Long-term risk

Long-term risk 1

M&A associated risk: ESG risks of a company that NRI acquires.

Business impacts

Moving ahead with global business is stated as one of the goals in the Medium-term Management Plan of NRI, indicating that M&A in overseas business will become active more than ever. Review of business risks and financial risks will be duly conducted prior to the acquisition, however if any long-term potential ESG risks that cannot be recognized at the time of acquisition emerge, that would cause reputation damage and negative impact to the business continuity of NRI.

Mitigating actions

Prior to actual M&A, ESG risk related due diligence is conducted including environmental and human rights risk, in addition to due diligence for financial risks and legal risks. Also, after acquisitions, in order to enhance corporate governance, we provide the principle-base education including dissemination of the NRI Group business philosophy to the managements and employees of the acquired company.

Long-term risk 2

The climate change risks associated with CO2 emission by electricity use of the Data Centers

Business impacts

Greenhouse gas emissions from electricity usage at NRI's five data centers account for 72% of the NRI Group's total emissions.

Along with rapidly proceeding international consensus of the climate change, there is a risk of increase in operation costs of the data centers due to introduction of new regulations or tax systems.

Mitigating actions

All data centers have acquired ISO14001 certification, and we have set environmental targets to reduce greenhouse gas emissions by 55% compared to FY2013 by FY2030, and are focusing on efforts to reduce environmental impact.

We are also working to reduce power consumption and greenhouse gas emissions by raising the environmental performance of data centers to the top level in the world.

In addition, we are beginning to utilize emissions trading in case the environmental regulations cannot be cleared due to efforts to reduce environmental impact.

▶ Response to risk**Integrated risk management structure**

NRI divides risk into three categories: 1) Company-wide risks; 2) Business activity risks; and 3) Disaster or accident-related risks. We have developed a risk management structure for each type of risk, working closely together as an organization to conduct integrated risk management.

Periodically we perform assessments of this risk management structure, making improvements when necessary.

We have instituted business continuity and disaster recovery plans especially for those businesses and services which may have a significant impact on society.

Response plans for large-scale disasters, accidents and incidents, and epidemics

In the event of a disaster or accident, we will ensure the safety of group employees, protect important information systems and information assets of our customers, and strive to continue operations.

In preparation for large-scale natural disasters, infectious diseases and contingencies of the NRI Group, the risk management department and related risk departments work together to consider preventive measures as necessary.

Their work also includes examining preventive action plans.

On the intranet, we post an emergency action guideline and a contact system to ensure thorough internal awareness.

In addition, we carry out drills every year for quick response by utilizing the "Emergency Safety Confirmation System" that allows us to confirm the safety and attendance status in case of a disaster by e-mail or telephone.

Crisis management

We have created an "emergency response plan" that summarizes the basic response system and procedures for emergency situations.

In the event of a natural disaster such as a large-scale earthquake, the spread of infectious diseases, large-scale system failure, information security failure, etc., we will establish a company-wide crisis management system at an early stage and consider measures in cooperation with our customers.

For large-scale system failures and information security failures, we will implement measures such as failure recovery, investigation of causes, disclosure of information, and consideration of recurrence prevention measures, while taking into account the status of the failure.

▶ Emerging risks

Emerging Risks 1

	Human rights risks in system development using artificial intelligence(AI)
Content of risk	<p>In the future, NRI will increase contract development of system using AI.</p> <p>Our clients include financial institutions or retail companies, and it is expected that AI will be used for credit scoring, targeting advertising, and direct marketing by profiling.</p> <p>There will be concerns about the negative impacts on personal information protection or right to privacy, and the occurrence of discrimination or social exclusion by using AI.</p>
Business impact	<p>Advances in AI technology will increase the demand for building business strategic systems which will possibly increase our sales.</p> <p>On the other hand, these advances in AI technology and related strategic systems demand will cause social issues related personal information protection, right to privacy, discrimination, social exclusion, etc. which may damage our reputation and reduce our sales.</p>
Measures	<p>We need to establish processes and regimes that enable the development of reliable and high quality AI systems.</p> <p>We aim to develop technology for high-quality AI that secures reliability, privacy, security, and dependability by ensuring fairness, accountability, transparency, etc., and establish operation standards and systems.</p> <p>NRI formulated the "AI Ethics Guideline" in FY2019, which summarizes the ideas and guidelines for developing and utilizing AI while referring to international principles such as The OECD AI Principles and Ethics guidelines for trustworthy AI.</p> <p>Going forward, we will continue to study and develop a system within the company so that the ideas expressed in these guidelines can be appropriately reflected in NRI Group activities.</p>

Emerging Risks 2

	Cyber terrorism risk by IoT
Content of risk	<p>There is an increasing number of "connected cars" that connect to networks and provide various useful functions.</p> <p>In 2020, commercialization of self-driving cars that safely drive under the advanced network system will begin.</p> <p>Furthermore, cars are evolving into more comfortable transportation with the evolution of Information and Communication Technology.</p> <p>On the other hand, there is a risk of being exposed to "cyber attacks" that could not be considered with conventional vehicles.</p> <p>In addition, not only cars but also home appliances etc. are connected to the network, and the risk of "cyber attacks" is increasing.</p>
Business impact	<p>In system development, more advanced measures for security are required than before.</p> <p>While IoT connects many devices to networks and creates a more convenient society, the risk of cyber terrorism is increasing.</p> <p>NRI, as a system development and management company, will have more serious human life-related responsibilities than before, and with regard to security measures, we are required to respond with a complete system of security measures based on the latest trends.</p> <p>If our client company falls victim to cyber terrorism, it will be an irreparable reputational damage for us as a system development company.</p>
Measures	<p>NRI promotes security measures across the group.</p> <p>NRI SecureTechnologies, Ltd., a security company within the NRI Group, launched a "Automotive Penetration Test" service for automobile manufacturers in May 2017.</p> <p>[Related article] https://www.nri.com/en/journal/sustainability/2017/12.</p> <p>In addition, NRI Secure Technologies, Ltd. also provides security monitoring services in Japan, a service few companies provide.</p> <p>NRI SecureTechnologies, Ltd. also has a branch office in California which excels in cyber technology, and has a system in place to understand the status and information of advanced security technologies.</p> <p>NRI Secure Technologies, Ltd. has in-house white hackers (hackers of justice) including winners of the global hacking tournament, etc., and they aim to reduce security risks in the system development in the group by utilizing their high level of expertise.</p>
Link Files	<p>Protecting Our Motorized Society from Cyber-attacks</p> <p>https://www.nri.com/en/journal/sustainability/2017/12</p>

▶ Risk culture

Training and awareness on risk management

We conduct training for each hierarchy level, educate all employees via e-learning, and raise awareness through compliance-awareness surveys.

Evaluation and financial incentives

An oversight department is established for each of the risks associated with business activities, and the results of risk management are directly reflected in the performance evaluations of the heads of the oversight departments.

Other risks*¹ may be reflected in the evaluation for the head of a department, depending on whether they are responsible for the risk.

Furthermore, in regard to human rights and labor risks*² for employees supervised by those in management positions, the same is directly reflected in performance evaluations as the results of managerial risk management.

*1 Compliance risks, human rights and labor risks related to employees, etc.

*2 Health and safety, extended work periods, discrimination and harassment, etc.

Finding and reporting of potential risk by employees

When an employee of a NRI group found all risk including an incident on the law breaking and the information securities, it's required to report it to a risk supervision department based on a usual report line and also it's required that a risk supervision section concerned will report it to a risk management charge official.

We have established an external-service hotline (attorney's office) for the purpose of discovering and correcting any risks, including illegal activities.

Feedback process on potential risk

Ability to respond to risk is raised by a business promotion committee's by holding in twice for each of every quarter of the year developing a risk case promptly for all fields also sharing information during a section.

■ Compliance - Management Approach

Material issues of NRI related to this management approach

It is the basis of all materiality of 15, but in particular "Prevention of overseas corruption"

NRI's approach to material issues

With the expansion of the global economy, societal demands for companies to engage in fair and transparent business activities are becoming more and more relentless.

In particular, laws and regulations are being strengthened worldwide for issues that transcend borders and have a large social impact, such as anti-corruption, unfair competition, and tax compliance.

The NRI Group aims to expand its global-related business in its "Vision2022" medium-term management plan, and will strengthen its global compliance system, prioritizing thorough compliance with laws and regulations above all else.

Furthermore, we recognize that it is the premise of sustainable business activities to not only comply with laws and regulations, but also act in accordance with international social norms.

Priority activities / Medium- to long-term targets

NRI respects and practices the spirit of the Charter of Corporate Behavior as a member of the Keidanren (Japan Business Federation).

The NRI Group has established the "NRI Group's Code of Business Principles" and the "NRI Group Employees' Code of Business Conduct" as standards for all directors and employees to comply with.

Furthermore, in 2016, we established the "NRI Group Anti-Bribery Policy" and "NRI Group Competition Law Compliance Policy" to strengthen global compliance.

▶ Compliance policy

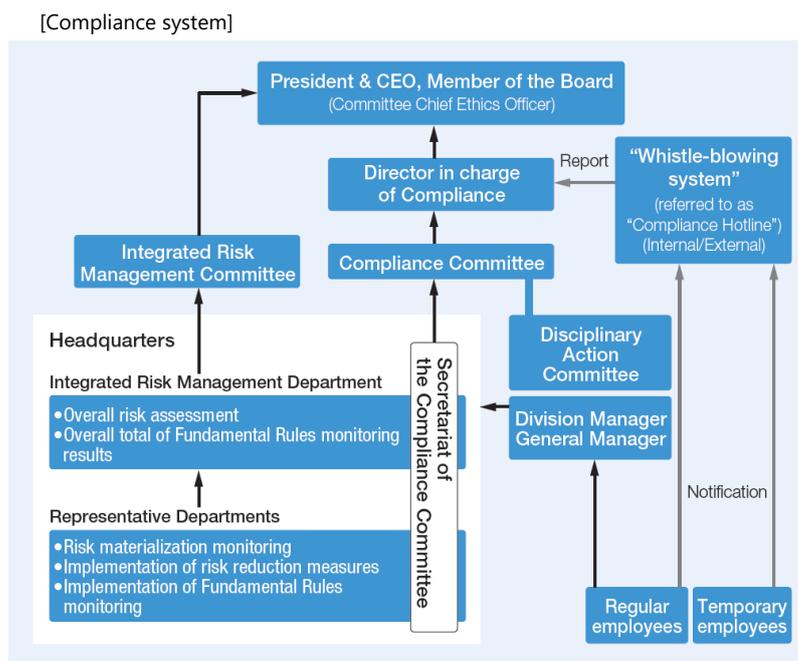

Compliance policy	
	<p>The NRI Group is sincere in its observation of ethics and laws and regulations, and strives to ensure thorough compliance. we have also formulated a policy on the prohibition of bribery and compliance with antitrust laws.</p> <p>The "NRI Group Employees' Code of Business Conduct," which was established to realize the "Corporate Philosophy" and the "NRI Group's Code of Business Principles," establish that "employees shall not have any relationship whatsoever with antisocial forces, such as violent organizations, nor with any individual or groups engaging in criminal activity."</p> <p>Furthermore, by establishing a mechanism for the proper processing of reports concerning organizational or personal violation of laws and regulations from persons engaged in the NRI Group's business (including not only company employees, but also employees of partner companies), we will aim for prompt detection and rectification of such misconduct, thereby strengthening compliance management.</p>
Applicable scope	All directors, officers and employees of NRI Group
References	<p>Corporate Philosophy https://www.nri.com/en/company/c_philosophy</p> <p>NRI Group's Code of Business Principles https://www.nri.com/en/company/company_code</p> <p>NRI Group Employees' Code of Business Conduct https://www.nri.com/en/company/business_code</p> <p>NRI Group approach to compliance https://www.nri.com/en/sustainability/social/policies</p>

Compliance system

Compliance system

To secure effectiveness of management in observation of ethics and compliance, in addition to the Chief Ethics Officer and a Director in charge of Compliance being assigned and a Compliance Committee being established and operated, its settlement and improvement in its effectiveness has been targeted by continuously conducting training and enlightenment activities.

In addition, a basic policy has been established for anti-social forces, not to have any relations, including business transactions, with them, with the representative department undertaking information gathering as well as management and response to prevent any transactions.

Officer in charge

Chief Ethics Officer : Shingo Konomoto
President & CEO

Director in charge of Compliance : Yasuo Fukami
Representative Director, Member of the Board, Senior Executive Managing Director in charge of Supervising of Corporate Administration

Responsible committee

Compliance Committee

Compliance hotlines

We have set up a number of reporting desks, including an external reporting desk (attorney's office), to provide for anonymous reporting and consultation relating to violations of laws and regulations. In addition, protections for whistleblowers are in place, including the prohibition of disadvantageous treatment such as dismissal or termination of contract based on said whistleblowing. Measures are taken in the event of such reports, including those for prompt handling after investigating the facts, and also those preventing any recurrence of the situation.

Third-party audit of compliance system

As part of the creation of an internal control audit report, the compliance system is audited annually by an auditing firm.

Compliance situation

System of thorough compliance

Every year, management set important risks that should be prioritized the following year as "major themes" based on the results of company-wide monitoring of compliance with regulations and the results of internal audits, and the NRI Group is focusing on compliance with the rules.

The "major themes" are reflected in a booklet that is distributed to all employees of the NRI Group entitled "The NRI Group Rule Book: Fundamental Rules for Executive Officers and General Staff", which explains the nature of the rules and their legal basis, as well as providing examples.

The state of compliance with respect to the rules included in the booklet is regularly monitored, and if any issues are found, the head office organization and business divisions work together to make improvements.

Compliance awareness surveys for all NRI Group employees are conducted in principle every other year. In addition to training for each hierarchy level and executive training, confirmation testing relating to the "The NRI Group Rule Book:

Fundamental Rules for Executive Officers and General Staff" is also carried out (in an e-learning format).

	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Completion Rate for Compliance Confirmation Testing (held every other year)*	%	98.9	—	—	—	97.9
Coverage		a-				b-

■ Supply Chain Management - Management Approach

Material issues of NRI related to this management approach

"Dialogue with civil society" and "Show consideration for environments in our supply chain"

NRI's approach to material issues

The NRI Group believes that its business is built on collaboration with its business partners such as its external contractors and suppliers.

For that reason, the NRI Group's basic policy is to build business relationships that comply with both the law and sound business practices, to the benefit of both parties.

In order to maintain the services that it delivers that act as foundations for the society, it is essential that the NRI Group continues to have good relationships with its business partners, and to grow together as partners. To that end the NRI Group:

- Shares its management policies with its business partners.
- Provides information and opportunities for its business partners to grow together with the NRI Group.

• Provides rules and procedures to maintain a sound operating environment with its business partners, which it also monitors periodically.

Furthermore, in conducting business both in Japan and overseas, there are now strong demands for engagement with respect to a "responsible supply chain," and in addition to responsibility with respect to legal-compliance, product quality. And information-security aspects, there is a need to work together with our business partners to also tackle ESG issues such as environmental protection, proper labor practices, and respect for human rights, etc.

Accordingly, "Respecting ESG" has been clearly stated in the "NRI Group Procurement Policy," and we have shared our policy of observing laws, regulations and social norms while simultaneously engaging in procurement activities that are considerate of the environment and human rights, etc., and working together with our business partners in contributing to the creation of a sustainable society.

Priority activities / Medium- to long-term targets

As an environmental initiative, we are currently making progress with setting environmental targets in supply chains.

For our business partners that account for 70% of Category 1 (Purchased Products/Services), Category 2 (Capital Goods), and Category 11 (Sold Products and Services) in Scope 3, which has a large impact on greenhouse gas emissions, we are also working to have them set targets for greenhouse gas emissions.

As a human rights initiative, we are considering a commitment from business partners ensuring compliance with our human rights policy by FY2022, and are currently making progress in dialogues with key business partners.

Progress / Achievements / Challenges

NRI conducts "Sustainability study sessions" with business partners every year to prepare for the ESG activities that will be demanded of the entire supply chain in the future.

At the meetings we share information and exchange opinions on ESG trends in domestic and foreign companies, as well as on the status of ESG activities of participating companies, including NRI. Above all, much time is devoted to human rights.

In FY2019, 20 business partners participated.

In FY2020, we plan to encourage active participation in "Sustainability study sessions" in order to continue dialogue and awareness-raising with business partners in order to achieve our supply chain goals.

Supply Chain Management - Data

Supply chain management policy

Policy to apply to suppliers

	The NRI Group has, through its NRI Group Procurement Policy, made stipulations concerning partnership creation and fair selection with respect to business partners such as outside contractors and suppliers. Furthermore, in order to require business partners to take activities that take into consideration ESG (environmental, social, governance) factors, we have established an item "Practice of Sustainable Procurement" in our procurement policy.
Applicable scope	Directors, officers and employees of NRI Group, and business partners such as outside contractors and suppliers.
Reference	NRI Group Procurement Policy https://www.nri.com/en/company/partner

Supply chain situation

Supplier overview

	The below are the NRI Group's two main kinds of business partners: (1) Partner companies (outside contractors) (2) Vendors (hardware suppliers)					
	Speaking from the perspective of systems integration, the NRI Group accepts a not insignificant amount of orders from clients (customer corporations) seeking the construction and operation of information systems. In such cases, the NRI Group takes charge of the upstream processes such as design, while the downstream processes are subcontracted to partner companies.					
	There is no difference between the NRI Group and its partner companies, in the sense that they form a group of systems engineers.					
	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Number of Chinese partner companies*		21	18	18	18	20
Approx. no. of partner employee in Japan	no. of person	7,500	7,000	7,000	7,000	7,500
Approx. no. of partner employee in China	no. of person	4,000	3,500	3,500	4,000	5,000
	Coverage	c	c	c	c	c

* In October 2015, NRI inherited an NRI-oriented offshore development project from SinoCom Software Group Ltd., an offshore partner in China that was also an e-partner of NRI. Partially as a consequence of this, there has been a decline in the number of China offshore partner companies and partner personnel (approximate figures, China) in FY2016.

	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Total outsourcing expenses	millions of yen	139,303	126,361	135,522	150,635	161,305
Breakdown by country / region	China	23,476	18,815	19,532	23,213	28,514
	Coverage	a	a	a	a	a

Critical supplier

We also sign "e-partnership" agreements with companies that possess particularly sophisticated operational knowhow and IT capabilities.
 We work closely with these businesses on project management to ensure thoroughness in their information security management and to improve their levels of quality management, as well as to provide assistance with their human resources development.
 As of March 31, 2020, we had 8 such e-partners in Japan and 7 in China.
 In FY2008, we set up a system for certifying "extended e-partners" ("e-e partners") in recognition of their ability to undertake enhancement service reforms for their company as a whole and not just for specific projects with us. As of March 31, 2020, we have 3 e-e partners in Japan.

	unit	FY2015	FY2016	FY2017	FY2018	FY2019

Number of e-e partners	Number of companies	3	3	3	3	3
Japan	Number of companies	3	3	3	3	3
	Coverage	c	c	c	c	c

Promoting offshoring

Our offshore partner companies now account for around 40% of the total number of operations we outsource for developing systems.
 The NRI Group is proceeding to diversify its outsourcing destinations.
 It is moving to press forward with its offshoring*¹ in China not just in its larger cities such as Beijing and Shanghai but also in regional bases in China, in collaboration with its Chinese partner companies.
 The number of Chinese partner companies in our IT solutions business stands at 20 companies in 20 regions as of March 31, 2020.
 In addition, we are promoting nearshore development*² in Japan and offshore development in Southeast Asia as China Plus One.

*1 Offshoring: Outsourcing software development and systems development to companies and subsidiaries overseas.

*2 Nearshore development: To outsource software development and system construction to a company or subsidiary in a remote area in Japan.

Supply chain risk assessment

Supply chain risk assessment measures

Before consigning the development of any NRI system to a potential partner, we conduct a comprehensive assessment of the company, investigating among other matters its technological capabilities; the quality, delivery timeframes and cost of its products and/or services; its human resources and its organizational structure; its financial position; and its measures on compliance and information security management.
 With a potential overseas partner in addition we conduct such investigations as are required by law, for example under the Foreign Exchange and Foreign Trade Act.
 Regarding information security, to ensure that our partner companies provide the same level of security as we do, the NRI Group requires them to sign confidentiality agreements and memoranda on the handling of personal information. In addition, NRI requests that they comply with its Security Guidelines, and also conducts regular checks on these companies by performing assessments of all aspects of their management of security and privacy.
 We have also provided hands-on training in dealing with phishing emails for those of their employees who are engaged full-time on security issues.

Supply chain risk assessment results

After evaluating risk in the supply chain, the NRI Group believes that there are the following two risks with respect to partner companies:

1. Good business relationships with subcontractors

In the fiscal year ended 31st March, 2019, our subcontractors were responsible for 40% of NRI's actual production.

It is essential to secure top-level subcontractors and maintain a good business relationship with them in order to carry out NRI's operation.

At NRI, we strive to secure superior subcontracting partners by performing corporate screening regularly and searching for new collaborating partners both domestically and overseas.

Furthermore, we are conducting activities to raise productivity and quality, including activities with subcontracting partners, through such measures as sharing of project risks with e-Partner Contracts, a contracted business partner with high levels of specialized business expertise, and demands for greater security and thorough information management on the part of subcontracting partners.

Our subcontracting partners are not only in Japan, but also in various overseas locations, including China. Currently, Chinese companies account for 17% of subcontracting costs.

We are therefore striving to strengthen this system of cooperation by regularly dispatching executives and employees to China to visit subcontracting partners and check the status of projects.

In spite of all these efforts, in case we fail to secure superior subcontracting partners or maintain a good business relationship with them, we might not be able to conduct business smoothly.

Especially in subcontracting to a subcontracting partner overseas, an unexpected event might occur caused by political, economic, or social factors which are different from those in Japan.

2. Contract work

There have been calls for appropriate responses in compliance with labor-related laws when contracting business outsourcing work is carried out under service contracts.

NRI has formulated guidelines relating to contract work to raise common awareness of this problem and to allow the awareness to take root in NRI.

In addition, we host meetings to explain our policies to subcontracting partners as part of our drive for entirely appropriate business outsourcing.

If despite these efforts, work outside the scope of the contract work is carried out and disguised contract issues and so forth arise, NRI may lose credibility.

► Fair trade

Fair business relationship with business partners

In accordance with antitrust legislation, the NRI Group prohibits employees from abusing their dominant position as outsourcers.

Furthermore, with respect to compliance with the Act against Delay in Payment of Subcontract Proceeds, Etc. to Subcontractors, outsourcing to subcontractors is in thorough compliance with the law, including with respect to the exchange of order documents, and payment dates.

In addition, we inform our partner companies in writing that we decline offers of gifts and entertainment, and we thoroughly ensure our employees at the NRI Group are aware of the same.

Voluntary inspection for appropriate subcontracted operations

The partner companies engaged in business with NRI employ just over 12,500 employees between them, and around 40% are full-time at NRI's facilities.

Appropriate measures in accordance with labor-related laws are required for outsourcing under a contract contract.

Work with these subcontracted employees to maintain proper contract work, separate the subcontracted employee's workplace from the NRI employee's workplace, and conduct annual voluntary inspections of the contract work guidelines to prevent spoofed contracts.

Voluntary inspection results	FY2015	FY2016	FY2017	FY2018	FY2019
Number of inspected projects	877	922	939	926	1,206
Coverage	c	c	c	c	c

* The target of inspection is the number of persons in charge of execution from FY2019.

Information security of supply chain**Strengthening management of information security at our business partners**

To ensure that our partner companies provide the same level of security as we do, the NRI Group requires them to sign confidentiality agreements and memoranda on the handling of personal information. In addition,

NRI requests that they comply with its Security Guidelines, and also conducts regular checks on these companies by performing assessments of all aspects of their management of security and privacy.

Assessments of business partners	FY2015	FY2016	FY2017	FY2018	FY2019
Number of assessed companies	83	87	81	76	95
Coverage	c	c	c	c	c

Supplier screening criteria**Supplier screening criteria**

We comply with laws and social norms, conduct ESG-friendly procurement activities, and appreciate business partners who contribute to the building of a sustainable society.

We provide opportunities for fair competition and comprehensively evaluate the status of environmental, societal, and governance efforts from the perspectives of business conditions, product and service quality, delivery, and cost, as well as contribution to society.

▶ Capacity building and incentives for suppliers

Efforts toward mutual development with partner companies

When the NRI Group outsources part of the operations for a project concerning the development or operation of information systems to a partner company in or outside Japan, the status of the outsourced processes as a whole, along with any issues and anticipated risks, are identified during regular joint meetings of the project team and responsible officers.

With our principal partner companies, quality management officers from both sides also meet regularly, and aim to ensure and raise quality levels.

The NRI Group is engaged in enhancement services reforms* to further improve quality and productivity. We are undertaking these activities in each project on an ongoing CSR Activities and Stakeholder Engagement basis in collaboration with our e-partners and other partner companies.

In fiscal 2008, we set up a system for certifying "extended e-partners" ("e-e partners") in recognition of their ability to undertake enhancement service reforms for their company as a whole and not just for specific projects with us.

	unit	FY2015	FY2016	FY2017	FY2018	FY2019

* Enhancement: the term we use to describe our maintenance and operation services for information systems. Since enhancement also includes improvements and proposals, we see it more as a full service operation providing support for our clients' entire business operations and systems.

Material issues of NRI related to this management approach

"Communication with customers" and "Appropriate disclosure of information to customers"

NRI's approach to material issues

Throughout the entire value chain, companies are responsible for continuing to provide products and services that meet the needs of customers and users in a safe and reassuring way. The NRI Group provides information systems to various industries and government agencies, and has a responsibility to not only direct customers, but also to think about the impact on general consumers and users who benefit from information systems and the impact information systems have on society. The NRI Group will provide the highest standard of information-systems services through advanced technologies and organizational systems relating to information system quality and information security, and through consulting and IT solutions will create the foundation for industry and technology innovation in the future and connect the same to economic and societal development.

Note: Please refer to the "Information System Quality" and "Information Security" sections below.

Client Relationship Management - Management Approach

Priority activities / Medium- to long-term targets

NRI Group has set "Discerning new social paradigms and assuming the role of implementing such paradigms" and "Building client's trust and prospering together with clients" in its corporate philosophy as its mission, indicating its intent to "co-create future society" together with the customers. We shall aim for sustained growth of NRI Group and the creation of a sustainable future society through "value co-creation" with our customers.

Long Term Management Vision "Vision 2022"

Under the abovementioned corporate philosophy, we have established "Vision 2022", the long-term management vision till the end of FY2022. "Share the Next Values!", the vision statement for Vision2022 expresses the intent of NRI Group to continuously make challenges for the realization of new values together with our customers.

Thoughts Concentrated in "Share the Next Values!"

- Share: The diverse variety of personnel within and outside the NRI Group join together to pool their collective effort, and share the achievements and joy of contributing to a vibrant future society together with our clients.
- Next: With the mentality of being ahead of the times, we pioneer globally, digitally, and into the realm of the future, to create new business models for the next generation.
- Values: We refine our strengths and create value by providing various types of services to clients and to society, giving birth to new future-minded business models.

Medium-Term Management Plan (2019 – 2022)

"Medium-Term Management Plan (2019 – 2022)" has been established as a plan for the four year period for the latter half of Vision2022.

This plan not only refers to growth strategy and numerical targets, but also on the three social values to be "co-created" with clients, indicating our intent to promote "sustainability management".

Growth Strategies (Priority Themes)

- DX strategy: Use technology to transform customer business models and processes
- Business platform strategy: Evolve business platforms (BPFs) in finance
- Cloud strategy: Modernize legacy systems by using cloud
- Global strategy: Achieve more global business growth, seeking sales of 100 billion yen
- Human resources strategy: Strategic recruiting, talent development and collaboration with partners to bolster NRI's competitiveness.

Numerical Targets

FY 2019 Record / FY 2022 Target

- Sales 528.8 billion yen / 670.0 billion yen or more
- Operating profit 83.1 billion yen / 100.0 billion yen
- Operating profit margin 15.7% / 14% or more
- Overseas sales 46.7 billion yen / 100.0 billion yen
- EBITDA margin 22.2% / 20% or more
- ROE 20.3% / 14% (Continue to aim for high capital efficiency)

3 Social Values

- Co-create a thriving future society by driving new value s
- Co-create an ideal society by effectively utilizing its resources
- Co-create a safe and secure society by advancing its infrastructure" at its core to promote business

Key performance indicator	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Operating profit	billions of yen	58.2	58.5	65.1	71.4	83.1
Operating profit margin	%	13.8	13.8	13.8	14.3	15.7
Overseas sales	billions of yen	14.6	18.9	43.5	53.0	46.7

► Fiduciary duty

Comprehensive deliberation on new contracts

In response to business contract requests from clients, we decide to accept them by conducting the examinations.
 We make our final decision after thoroughly considering the fiduciary duty on quality and delivered date, as well as legal, ethical and operational risks for the contract.

- Credit screening tapping into information from research firms
- Project-by-project deliberation at the Senior Management Committee and each division meeting
- Comprehensive assessment on the future potential, growth potential and social effects of the business

► Client satisfaction

Client satisfaction surveys

NRI conducts client satisfaction surveys for each project and has clients evaluate the entire project. We also obtain specific feedback from clients on our proposal-making skills and incident-management procedures.
 The quality control department analyzes the overall trend through the survey results.
 The project department will also receive survey feedback from the quality management department and follow up to implement measures to improve service quality.

Areas receiving a favorable assessment

- Understanding client's needs and issues
- Giving clients project progress and issues reports
- Specialized knowledge relating to systems
- System reliability

Areas of expectations for improvements

- Greater intelligibility of manuals
- Clarity of the basis for estimates and pricing

	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Client satisfaction* ¹ (percentage of "satisfied client")	%	83.5	82.8	84.6	86.9	83.8
Percentage of clients surveyed* ² (percentage of business units)	%	100.0	100.0	100.0	100.0	100.0
Coverage		c	c	c	c	c

*1 Calculating the weighted average as the percentage of clients who are "satisfied" with the top 2 stages out of 5 evaluation criteria.

*2 The survey is conducted for all business units of consulting business and IT solution business, clients and project service subject to the survey are extracted on a certain basis for each business unit.

■ Innovation Management - Data

▶ Innovation management policy

Approach to research and development

To create a sustainable society, companies are greatly expected to create innovation and contribute to solving social issues.

The NRI Group uses its high-quality study capabilities and R&D structures to pursue innovation-creating research and development.

In order to make use of that innovation generated in the form of actual systems that operate societies, the NRI Group publishes recommendations for new national schemes and rules.

We also put resources into communicating our study and research results so that innovations become widely recognized by members of the public and absorbed in their minds.

As R&D focus areas, NRI conducts R&D for different segments. Our Consulting R&D looks at next-generation business and strategies.

Finance & Industry R&D looks at promotion of DX and promotion of de facto standard business platform-ization.

IT Platform Services R&D involves continually monitoring cutting-edge technologies, and strengthening IT's power to provide solutions that apply those technologies to people's lives and to society at large.

▶ Research and development system

Research and development system

The NRI Group pursues R&D in three areas: "Social proposal", "Technical development", "Business development".

The NRI organizations responsible for the various areas of our R&D are as follows, but as needed they engage in collaboration with different organizations both within and outside our Group.

Research & Development Committee:
As well as propose and discuss R&D strategies, this Committee reviews individual projects from a whole-company perspective, from planning through to application of the results.

Center for Strategic Management & Innovation:
Responsible for government policy recommendations and advanced research functions, this Center conducts surveys on new systems for society.

Digital Transformation Production innovation Division:
Responsible for the NRI Group's technologies development, this Division conducts research into cutting-edge technologies and base technologies in the area of information technology.

Our business divisions:
Responsible for medium- to long-term business development and new product (service) development, these investigate product business feasibility, conduct product development, and undertake demonstration projects.

▶ Open innovation

Open innovation case 1

"Dokokani Mairu" is a mileage service for domestic flights in Japan that was developed in 2018, jointly between Japan Airlines Co., Ltd. (hereinafter, "JAL") and NRI. It enables users to go to one of four randomly displayed destinations ("dokoka" i.e., "somewhere") for less miles than usual.

An algorithm that was developed on the basis of a patent held by NRI is used in this service.

NRI and JAL established a joint venture, JAL Digital Experience, in 2019 to further advance these new service co-creation initiatives.

The company is engaged in experience-based services that propose enriching experiences and new lifestyles tailored to the latent needs of each customer, with travel as the foundation, while leveraging the NRI Group's digital technologies including data analytics and AI.

As well as expanding customer travel opportunities and offering new experiences, it is also a service that will help people rediscover the appeal of various regions in Japan and lead to regional revitalization - an innovation in which NRI's capabilities in analytics contributes to solving social issues.

Open innovation case 2

NRI and Nomura Holdings, Inc. established BOOSTRY in September 2019 as a joint venture to develop and provide a platform for exchanging rights to securities using blockchain technology. BOOSTRY brings together personnel from both NRI and Nomura Holdings with expertise in areas including finance, law, blockchain technology, and IT solutions to pioneer the business of building a new platform for businesses and other entities to issue and distribute securities and other rights. Using the blockchain technology of BOOSTRY, NRI issued digital asset bonds and digital bonds in Japan in March 2020. The bonds use blockchain technology to manage the bond register, which makes it possible for the issuer to continuously identify bondholders, something that is difficult to do with conventional bonds.

Open innovation case 3

TORANOTEC Asset Management Ltd., TORANOTEC's wholly-owned subsidiary, offers a service called "TORANOCO" for investing using change. This is a service that allows anyone to invest with a small amount of money.

NRI has supported smooth service provision for "TORANOCO" by providing its investment account management system service and its back-office operations support service for asset management companies.

Going forward, through this investment, NRI will work on the further evolution of "TORANOCO" and the development of new investment services.

Specifically, by adapting "TORANOCO" to existing banks where NRI provides an account management system, it enables new approaches to young and inexperienced people who have not had investment experience so far.

We will also promote the development of new asset management services for smallscale investment for financial institutions.

Creation and acquisition of new market: By bringing young people and investmentexperienced people into the financial market, it can lead to the development of new financial system and service markets.

▶ Process innovation

Process innovation	
Overview	<p>Introduction of development tools of information systems</p> <p>We have built a tool for integrated management of both product quality improvement and operational efficiency in large-scale information system development. This tool is a "collaboration solution" that integrates the functions of project management such as quality management, progress management, and issue management to improve teamwork and productivity by accumulating and sharing knowledge and activating communication. It is composed of multiple solution packages such as "DevOps solution" that realizes continuous integration/delivery required for advanced software development. By introducing this tool, it has become possible to achieve both system management project sophistication and project member operational efficiency, as well as modernization and efficiency of the system development process. We have been selling this tool as a service called "Aslead" since 2017, and as of April 2020, we are providing four solutions, and we plan to continue providing new solution packages. It is expected that the results of NRI's process innovation will spread widely to the entire IT industry through "Aslead".</p>
Efficiency gains	<p>Improvement in efficiency by introduction of this tool is expected to create about 30 minutes surplus time per person, which will result in a cost saving effect of about 5.6% as a whole.</p>
Reference	<p>News Release (October 19, 2017) (In Japanese only) Started marketing of development tools of information systems "aslead" https://www.nri.com/jp/news/newsrelease/1st/2017/cc/1019 aslead (In Japanese only) https://aslead.nri.co.jp/</p>

▶ Environmental innovation

Environmental innovation																						
Overview	<p>Significant Reduction in CO₂ Emissions Due to Shared Online Services</p> <p>The usage of Shared Online Services leads to drastically reduced environmental impact. When multiple companies use a single system jointly, they can markedly reduce power consumption, CO₂ emissions and costs, more so than when each company independently developed their own system. Estimates show that THE STAR, a back-office system for retail brokerage firms, enables the user to lower its CO₂ emissions by 73.9%.</p>

■ Quality of Information Systems - Management Approach

Material issues of NRI related to this management approach

"Information security / system management"

NRI's approach to material issues

Information systems are widely and deeply ingrained in modern society in a variety of ways, and have become indispensable infrastructure for our convenient and comfortable lives. They are also cornerstones in the realization of new systems and services, and contribute greatly to societal innovation. On the other hand, when an information system fails, it has a large impact on economic activity and civic life. Since its establishment, the NRI Group has consistently focused on the quality of its information systems, from design through to maintenance and operation, with an emphasis on information services not stopping unexpectedly. In addition, all possible measures have been taken in providing backup and business-continuity systems in case of an emergency information system failure.

Priority activities / Medium- to long-term targets

The NRI Group provides total support, extending to maintenance and Operation, for the systems that we produce for a variety of business sectors, including the securities, banking, insurance, distribution, and communications industries. As well as develop a high-quality system within the time and for the cost agreed with the client, another important role for the NRI Group is ensuring the quality of our maintenance and operation of the system once it is up and running. From this perspective, in order to increase the reliability of our information systems, we at the NRI Group are directing our efforts towards the following priorities:

- Quality management in the development of information systems
- Quality management in the maintenance and operation of information systems
- Increasing the reliability of the data centers that support the systems' operation

Progress / Achievements / Challenges

NRI acquired certification for ISO9001 Quality Management System Standards in January 2002, which apply to information systems construction projects of a certain size or greater. In addition, in order to successfully guide projects building large and complex information systems to completion, we have established a project supervision system that systematically carries out risk management and project support.

Data center results

NRI is certified to ISO20000 and ISO27001, the international standards for IT service management, for all five data centers it owns and manages. In addition, three data centers (Tokyo Data Center I, Yokohama Data Center II, Osaka Data Center II) have acquired M&O certification, which is a global standard for data center operation established by the US non-profit organization Uptime Institute. "Tokyo data center I" was the first data center in Japan to acquire the certification (acquired December 2014).

KPI

Quality of Information Systems - Data

Management structure for improving the quality of information systems

Management structure for improving the quality of information systems

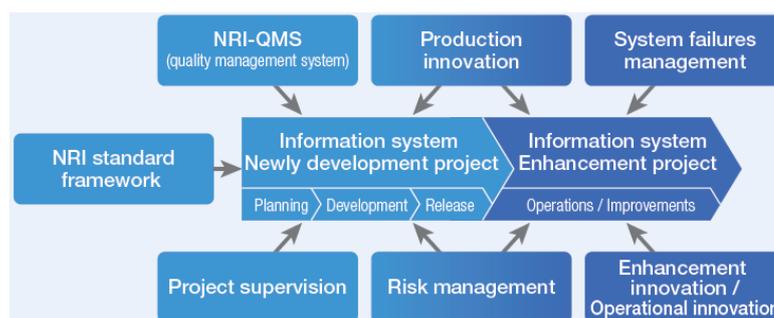

Each business division is responsible for quality control when implementing projects. Moreover, in addition to supervising and promoting such activities company-wide, as organizations providing separate support, the Quality Management Division and the Digital Transformation Systems Development Innovation Division set objectives and formulate plans relating to quality, and also build quality management systems, provide standard guidelines and advise on projects. We are also actively engaged in resolving issues concerning the improvement of productivity, based on the idea that "improvements in quality improve productivity, which leads to further improvements in quality."

Initiatives for improving the quality of information systems

Project support system for improving the quality of information systems

Each division is responsible for quality management over system development, maintenance and operations, and consulting services projects. In addition, NRI has an organization which proposes and supports quality management activities for each division

NRI-QMS* (Quality management system)

This is a quality management system built on the basis of know-how cultivated over many years of qualityimprovement activity. It involves the company having established internal rules, guidelines and models for business processes to ensure quality for individual projects, and is also a mechanism that seeks continuous improvement in quality through periodical reviews of the NRI-QMS itself based on customer satisfaction surveys and audit results. NRI has obtained ISO 9001 certification for quality management systems for applicable information system construction projects that require a minimum prescribed amount of labor.

* QMS: an abbreviation of "Quality Management System."

NRI Standard Framework

These are guidelines that containing standard processes for projects, as well as the activities and tasks to be carried out in each process, so that project quality and productivity increase through effective and efficient design and development in accordance with internal rules, project management, and review meeting audits taking place.

These guidelines are shared with all employees through the intranet.

They include tools and checklists to help improve quality and productivity, as well as samples, creation guides and case-studies for the deliverables (documents) that should be created in each process, and play a role in instilling practical know-how in the company.

Project supervision

In order to successfully build large-scale and complex information systems, for projects involving building new information systems, we support each business division from both the "monitoring function" and "promotion and support function" sides.

Separate from the "management" required for the implementation and success of each project, we are aiming for improved project quality by promoting "project supervision activities" that support early detection and responses for problems.

We constantly monitor the status of each project and provide assistance for project-manager tasks through support activities aimed at risk avoidance/mitigation, while also providing guidance on improving development processes and deliverables to enhance quality.

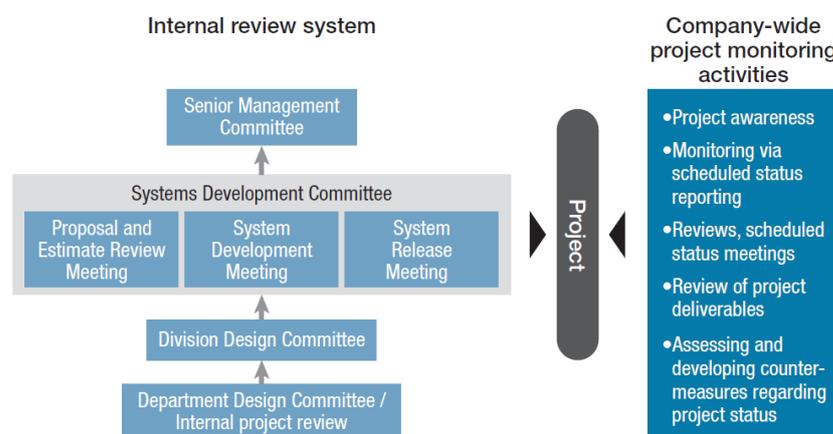

Furthermore, in order to understand and evaluate the risks relating to the quality, delivery, and income/expenditure for each project and respond appropriately, we conduct various review meetings in accordance with our internal rules at each critical juncture for the projects, including the proposal, estimate, construction, and release stages.

There are three levels for the review meetings: company, division, and department, and the size, characteristics, and difficulty of the information system being built will determine the review meetings allocated to it.

Each review meeting is not merely a process-checking opportunity; it is a place for a company expert who is well versed in areas such as project

management, quality control, and information technology to ensure high quality is realized by conducting a rigorous examination down to the details of the system and also provide appropriate guidance and support to the person in charge of the project, including advice and know-how.

The risks associated with each project are divided into five levels of impact, which are reported to the management meetings, and immediate or mid-to long-term measures are taken as required.

Production innovation

NRI has been building and maintaining systems by selecting the appropriate combination of technologies from the variety of technologies available to meet the needs of our customers. Based on that experience, we are endeavoring to improve productivity from the following perspectives. One is not only utilizing new functions when adopting new technologies, but also forming a group of experts for each technology to quickly acquire the expertise to ensure the quality and productivity of development using new technologies. Another is making progress with improvements in productivity that focus on shared processes that are not technologydependent in the maintenance and operation of the many systems NRI supports that apply various technologies from various time periods. We are aiming for "Production Innovation" by combining multiple policies in these two areas.

Information system failure management

NRI has created a company-wide system for reducing information system failures, with focused initiatives that have reduced the incidence of failures. At present, we are working to improve the quality of the system by appropriately implementing measures in the event of a failure along with measures to prevent recurrence, by establishing common rules throughout the company to ensure that action focusing on disaster reduction targeting the specific challenges at each location is continuously being taken. We manage failure impact levels in five stages according to the impact range of the failure, and have established reporting procedures for each failure impact level and created a mechanism that shares information without delay after a failure's occurrence. Failures that do occur are subject to deep and thorough analysis to clarify the root causes and allow relevant improvements to be made. We also have prepared a training curriculum on how to analyze failures and are working to improve the abilities and awareness of our employees and partners.

Enhancement service reforms

We will continue to support our customers' business, from the start of operation of information systems until they are retired. During that time, by improving functions according to business changes, system revisions, or advances in technology, a highly cost-effective system can be used for a longer period of time. NRI believes that it is important to continue to improve functionality while maintaining stable operation of information systems, and refers to the postoperation process commonly called maintenance as "Enhancement." Enhancement is a task that continues for a long period of time, and is characterized in that the losses from any unaddressed problems and benefits from improvements are both large. Therefore, in order to promote improvement activities throughout the company, we have established the slogan of "Enhancement Service Reforms," and we are continuing activities to create and realize a improvement plan for each system every fiscal year.

Quality management in the maintenance and operation of information systems

Overview of quality control

In order for created information systems to be utilized effectively, stable system operation is indispensable.
 The NRI Group has been offering reliable-quality system operation services 24 hours each day, 365 days each year for many years.
 NRI's Data Center Service Division has built an IT service management system called "System Operation ITSMS" based on that accumulated experience and ITIL*, and has been working to obtain ISO 20000 Certification, an international standard for IT service management, for the information systems it is entrusted with in its data centers.
 In accordance with the System Operation ITSMS, we are working to improve the quality of system operation and IT services by utilizing the results of customer satisfaction surveys and failure records.

* ITIL: an abbreviation of "Information Technology Infrastructure Library. "A systematic standardization of business processes and methods for performing the operation and management of information systems. A registered trademark of AXELOS Limited.

Policy

We provide high quality data-center facilities and operation services to all internal and external customers

ISO/IEC 20000 Scope

Relevant Locations

- Sapporo ITSM Center
- Yokohama Nomura Building

Efforts to improve operations quality and reduce system failures

In operation services for information systems, obstacles such as equipment failure, processing delays from sudden increases in data amounts, or malfunctions due to improper operation cannot be completely avoided.
 The system operation department is working on a variety of initiatives aimed at reducing these obstacles to increase productivity, including the strengthening of collaboration with the information system construction department, promoting standardization, automation, and labor-saving of operational tasks, and improving operator skills.

Quality of Information Systems - Data

Strengthening Collaboration with the information systems construction department

In order to improve the quality of information system operations, NRI is strengthening its approach with focus on operational quality from the systems construction stage.

Firstly, we are collaborating with the information system construction department and moving forward to standardize the operational tasks to ensure stable and efficient systems operation.

Items relating to operations have been established in the NRI Standard Framework as a part of the outcome.

Furthermore, we have also started training employees in the system construction department to carry out systems design with consideration on operational quality.

Secondly, in the event of a failure, the operation department cooperates with the information system construction department in the effort to clarify its cause and to take countermeasures.

We also cooperate with the departments in charge for other systems, where there are concerns of similar failures, in order to establish countermeasures to prevent the occurrence of such failures.

Promotion of Standardization, Automation, and Labor-Saving for Operations Tasks

NRI is promoting automation in order to eliminate failures due to human error, such as task omission or procedural errors in the operation of information systems.

We are using our own proprietary "Senju Family" operation management tool to make progress with automation, labor-saving, and mistake-reduction in systems operation, while at the same time achieving advance prevention of failures and prompt and appropriate responses if they do occur by standardizing tasks using other tools and leveraging collections of failure-response case-studies.

Promotion of Kaizen Improvement Proposal

NRI gathers more than 1,000 cases of proposals each year aimed at improving the quality of systems operations from employees of NRI and partner companies engaged in the operations of information systems.

We have an award system for outstanding proposals.

These proposals are reflected onto improvement activities, incorporating opinion from employees with thorough knowledge of the system operations.

Operational Skill Improvements aimed at Automation and Labor-Saving

In order to operate information systems stably, skill improvement of operators who operate the computers and network equipment is an important factor.

In particular, as automation and laborsaving— progress, it will be necessary for operators to acquire a high level of expertise to be able to cope with various failures with fewer people.

Accordingly, NRI conducts group and e-learning training for operators to improve their skills and awareness. Furthermore, to promote the desire of operators to improve and to have them acquire skills of a certain level or higher, a proficiency assessment system to judge proficiency through examination has been introduced since 2005.

Silver or Gold certifications are awarded depending on the skills and support improving operator skills and motivation.

Quality of Information Systems - Data

► Increasing the reliability of the data centers that support the information systems' operation

Increasing the reliability of the data centers

The stable operation of information system requires not only the quality of the information system itself, but also the quality of the data center that operates and manages the information system.

In order to ensure stable operation of information systems, and to provide safe and secure quality of services, NRI visualizes the risks related to data center services, conducting training for each type of issue that could be anticipated.

Furthermore, global-standard Management and Operation certification (M&O Stamp of Approval) relating to data center equipment and facility operation prescribed by Uptime Institute* has been obtained for three data centers, ("Tokyo Data Center I", "Yokohama Data Center II", and "Osaka Data Center II"), providing an objective appraisal of global standard in terms of high reliability.

The "Tokyo Data Center I" in December 2014 was the first example in Japan, and as of March 2020, only 5 data centers including 3 NRI data centers have been certified in Japan.

* Uptime Institute: A United States private organization that provides research, education, and consulting services for data center design, construction, and operation with the aim of supporting improved data center performance and efficiency.

As one of the world's leading independent organizations, it operates globally through locations worldwide (United States, Mexico, Costa Rica, Brazil, UK, Spain, UAE, Russia, China, Taiwan, Singapore, and Malaysia), creating tier standards for data center equipment and overseeing M&O certification.

M&O Stamp of Approval

December 2014 Tokyo Data Center I (Updated in December 2016 and December 2018)

February 2016 Yokohama Data Center II (Updated in February 2018 / Certification period extended by one year in February 2020)

December 2017 Osaka Data Center II (Updated in December 2019 (usually 2 years but 3 years from now))

▶ Issuance of SOC2 report

Issuance of SOC2 report

It is now a standard practice for global IT service companies to issue SOC2 reports. SOC2 reports are reports based on guidance published by the American Institute of Certified Public Accountants (AICPA) ("Report on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, based on Confidentiality or Privacy"), that evaluate the internal controls other than financial reporting, such as security and availability of subcontracted companies on the basis of criteria, such as trust services. As is the case with SOC1 report relevant to financial statements, the opinion of external auditors, the audit results, and a certificate of confirmation from the subcontracted company will be attached.

NRI was the first in Japan to issue SOC2 report in 2012. In issuing the reports, not only did we receive a guarantee of safety and reliability meeting United States standards; we also received third-party assurance that we comply with the safety standards of the Financial Information Systems Center (FISC).

(Note) SOC is an abbreviation of "Service Organization Control"

▶ Risk management on information systems

Risk management on information systems

As advance preparation for emergencies, the NRI Group has created an "NRI Group Contingency Plan" containing the basic response system and procedures in the event of an emergency situation.

Risk Management in Information Systems in the Maintenance and Operation Phase

In the event of a large-scale system failure, we will promptly set up an emergency response headquarters to coordinate with the relevant divisions and customers.

Based on the circumstances of the failure, we will implement measures such as disaster recovery, investigation of point of origin, disclosure of information, and analysis of preventive measures.

Risk Management in Data Centers

NRI's data centers have a Data Center Contingency Plan to support their customers' critical data. In case of an emergency, such as a power outage due to a large-scale earthquake disaster or trouble with system-related equipment, we carry out regular comprehensive inspections and crisis response drills.

Information Security - Management Approach

Material issues of NRI related to this management approach

"Information security / system management"

NRI's approach to material issues

As information systems penetrate into every corner of economic activity and civic society, the risks associated with information security, such as cyber-attacks targeting social infrastructure, companies or government offices, or large-scale data-breaches, are growing all over the world.

The NRI Group operates important information infrastructure that supports society, such as that for finance and logistics. In order to maintain service continuity and protect this valuable information, we are engaged in a variety of efforts to prevent information security failures in advance.

In addition, in the unlikely event an information security failure does occur, we have implemented measures to minimize any impact.

Priority activities / Medium- to long-term targets

Recognizing information security risk as an issue that should be addressed at the highest level in terms of technology and systems, the NRI Group has taken the following key measures:

- Advance prevention of information security failures
- Creation of a solid governance system for information security

Progress / Achievements / Challenges

Advance prevention of information security failures

In order to reduce the risk of a client's business data being leaked, we have established rules for each project concerning access to the live system environment and the removal of business data, which are continuously improved using the PDCA cycle.

In addition, system responses are in place as preventive measures against cyber-attacks, and include the use of antivirus software, encryption for hard disks, and a variety of security devices, and we are also promoting systematic activity to collect and evaluate vulnerability and attack information in advance and enable prompt and appropriate responses.

Creation of a solid governance system for information security

A Chief Information Security Officer has been appointed, along with managers and personnel responsible for information security in all business divisions and group companies, to establish an information security management system for the whole organization.

In addition to promoting information security measures, we are continuing our activities to enable rapid and more secure responses to emergencies, such as information security failures and cyber-attacks.

KPI	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Number of information security failures (year-on-year)		About 1% increase	About 11% decrease	About 11% decrease	About 27% increase	About 40% decrease
Number of major information security failures		0	0	0	0	0
Costs incurred due to major information security failures	millions of yen	0	0	0	0	0

Information security management

Governance system for the information security

NRI has appointed a Chief Information Security Officer, who has developed a system of information security management for our organization as a whole.

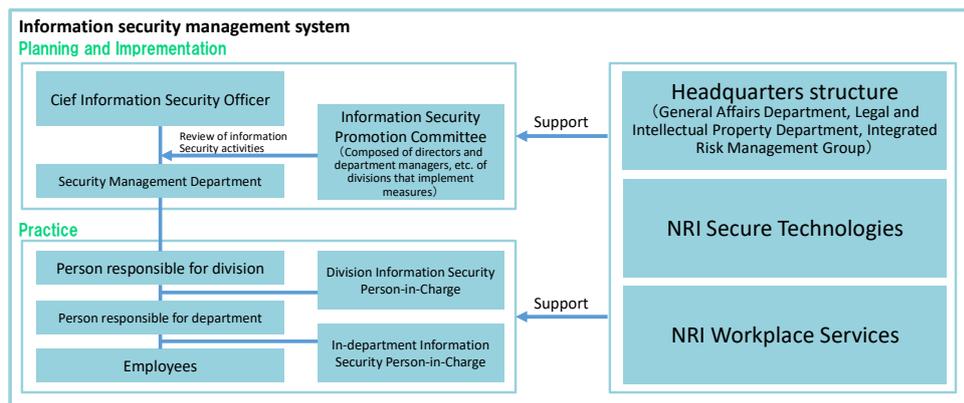

All business divisions and Group companies have appointed an information security manager and information security person-in-charge (PIC), who have developed a mesh structure that allows security measures to be undertaken on a cross-organizational basis. As well as furthering the implementation of our information security policies, this structure will enable us to respond swiftly, accurately, and reliably in the event of cyber-attacks and other security emergencies.

The NRI Group contains specialist organizations that conduct surveys and research of the latest information technologies, as well as NRI SecureTechnologies, Ltd. that engages exclusively in information security business.

We will draw on their technology, know-how and knowledge when preparing and implementing our information security policies.

We have appointed an information security manager and an information security PIC at each of our overseas and domestic Group companies, who are directing the development of an effective information security system and the drafting of an information security enhancement plan at their company.

In addition, the NRI Group has set certain information security protection standards, and engages in

Officer in charge	<p>Chief Information Security Officer : Susumu Nishimoto</p> <p>Senior Managing Directors</p>

Information Security - Data

Maintenance of rules for the information security

In response to laws and regulations related to information security and the advance of information technologies, we establish or revise management rules as appropriate, including the Information Security Management Rules, Confidential Information Management Rules, Personal Information Management Rules, Specific Personal Information Management Rules, and Information Asset Management Rules. In addition, we have prepared operating procedures, guidelines, manuals, etc. for each of these management rules to ensure that consistent and effective information security management is conducted.

Training and awareness on information security

NRI conducts ongoing information security education to raise the awareness of information security, instill regulations, and improve the quality of security during design and development. In addition to conducting specific training tailored to the particular characteristics of our Divisions and Group companies, we arrange training for our overseas offices that can be undertaken in English and/or Chinese. We also actively incorporate group training and e-learning methods into our training programs.

Number of information security training participants	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Training for new employees	no. of person	350	355	392	515	557

Measures to prevent occurrence of information security failures

Information security in client's information system

In order to reduce the risk of business data being leaked, we have established rules for each project concerning access to the live environment and the removal of business data, which are continuously improved using the PDCA cycle. For example, for projects that handle large amounts of personal information or projects that store information that would have a large impact on the client in the event of a leak, the oversight departments conduct individual inspections to confirm that operation is taking place in accordance with the rules. In addition, the oversight departments also check the validity of any initiatives concerning handling of any data alteration from cyber-attacks, or system service suspensions.

Audits undertaken to ensure the security of clients' systems	Object	FY2015	FY2016	FY2017	FY2018	FY2019
Verification assessments conducted of project security rules	no. of audits	231	269	230	165	141
Audits of public Web system	no. of audits	49	37	84	77	83
Audits of responses to cyber-attacks, and corrections	no. of audits	130	128	145	148	149

Audits of responses to cyber-attacks, and corrections	10	16	14	4	3

Information Security - Data

Company-wide responses to cyber-attacks

The NRI Group uses system-based defences against cyberattacks, such as installing anti-virus (anti-malware^{*1}) software, hard drive encryption, and installing different security measures (such as firewalls, WAF^{*2}, and network behavior analysis technology^{*3}).

With cyber-attacks, however, it is the attackers who have the upper hand, and NRI is well aware that just system responses alone are not enough for defense, and to that end it is putting in place a Computer Security Incident Response Team (CSIRT^{*4}).

A CSIRT acts like a fire extinguisher, denying further success to any attack that does in fact strike a system.

It collects, evaluates and shares information on vulnerabilities and attacks, and takes action that is organized, swift, and appropriate.

We also conduct for our employees education and training, such as ongoing real-life training against phishing emails.

*1 Malware, or "malicious software," is a software program that upon infecting a computer automatically takes remote control of that computer, either stealing data that it stores or causing it to attack other computers.

*2 WAF: Web Application Firewall. A system that detects attacks that exploit vulnerabilities in Web applications and protects against those attacks.

*3 Network behavior analysis (NBA) technology: Malware used in a phishing attack is often produced to target a specific company alone, which means it may not be possible for general anti-virus software to detect and eliminate it. NBA technology works by running software suspected of being malware in a highly restricted environment called a "sandbox." Checks are then made to see if the software is engaging in behavior such as information exploitation or preparatory activity to that end, and if it is, it is eliminated.

*4 CSIRT: Computer Security Incident Response Team. This is the entity (a team) that takes the appropriate response when it receives notice of a computer security incident. Alternatively CSIRT refers to the functions of that entity.

Managing human error

We have implemented layer upon layer of defenses designed to prevent email-related problems, such as installing software that prevents emails being sent to the wrong recipients, applying rigorous management of emails being sent to multiple destination, and encrypting attachment files. In projects involving the handling of highly sensitive information, we sometimes also require employees to get their supervisor's approval before sending certain emails.

► Penetration Test

Penetration Test

NRI conducts a penetration test on our website every month in cooperation with NRI Netcom, a group company, as part of measures against cyber attacks.

► Policies for minimizing the impact of information security failures

Policies for minimizing the impact of information security failures

The NRI Group has rolled out a centralized information security failure management system.

A feature of this system is that a failure is not just reported one-way from where it has occurred - the system employs interactive communication, which allows decisions to be made based on a bigger picture formed from a range of perspectives.

As well as achieving swift and appropriate responses to an individual failure, this feature helps to extend the take-up of improvement policies throughout the company.

We have put in place a response system (which includes a Crisis Management Committee) based on the scenario of a cyber-attack. We have also drafted a Contingency Plan and conduct response training drills, helping us to be prepared for unexpected situations.

► Certification on Information Security Management System (ISMS^{*1})

ISMS certification acquired	Name of company, office, or division

■ Environmental Management - Management Approach

Material issues of NRI related to this management approach

"Response on climate change", "Consumption of sustainable energy", "Recognize responsibility and protect the environment", and "Show consideration for environments in our supply chain"

NRI's approach to material issues

The rapid development and widespread use of information technology has meant that the amount of electricity consumed by information and communications technology (ICT) businesses as a whole, as well as the CO₂ emissions this represents, has become a serious global issue. Taking responsible action to help prevent global warming has therefore become a pressing obligation for the ICT sector.

The NRI Group is actively working to solve global environmental problems from both approaches of "Green by NRI" and "Green of NRI".

Green by NRI refers to our contributions to help reduce impacts on environment by improving the efficiency and productivity of both our clients' businesses and societal systems through the services and policy proposal activities we provide.

As an example of the great impact of "Green by NRI" activities, by expanding the provision of "Shared Online Services" that utilize one information system in multiple companies, the amount of CO₂ emissions is greatly reduced as measured by society as a whole.

Green of NRI refers to the NRI Group's efforts to further mitigate our own environmental impact by making NRI's data centers, office buildings and IT equipment more energy efficient and through environmental measures such as energy saving efforts of each of our employees.

As an example of the great impact of "Green of NRI" activities, we are promoting the reduction of energy consumption by raising the environmental performance of the data center which accounts for about 80% of the electricity consumed in the business to the world's highest level.

Priority activities / Medium- to long-term targets

The NRI Group has engaged continuously in efforts to reduce greenhouse gas emissions, from moving our systems to a new data center with better environmental performance, to moving our main offices, including our Head Office, to office buildings with better environmental performance. As a result, we have achieved the 2022 environmental goal we established 2015 six years early, in 2017.

The new environmental goal* we have established is one that adheres to the international request for measures against global environmental issues, with a standard meant to help achieve the "below 2 °C"* increase in world average temperature that is the goal of the Paris Agreement.

[Newly Established Environmental Goal]

NRI Group greenhouse gas emissions (Total of Scope1+Scope2): 55% reduction by 2030 (as compared to 2013)

In addition to the aforementioned goal, we have also established some indices: "renewable energy utilization rate at data centers," (36% by 2030) to expand our use of green energy as a data center business and also aimed at reducing the greenhouse gas emissions that arise from business operations in the supply chain as a whole.

(NRI commits to engage 70 % of its suppliers and vendors by emissions to set science-based targets by 2023)

* Goal aimed towards the achievement of "below 2 °C":

Numerical value was set based on the goal-setting standards of "Science Based Targets (SBT)," an international initiative that ask companies to set greenhouse gas emissions reduction goals in line with scientific evidence, towards the achievement of the "below 2 °C" increase in world average temperature that is the goal of the Paris Agreement.

Progress / Achievements / Challenges

The status of achievement of environmental goals is as follows.

- FY2013 (base year): 108 thousand t-CO₂
- FY2019: 60 thousand t-CO₂
- Reduction rate 43.8%

NRI's efforts in helping to prevent global warming have been appraised highly by CDP, an international non-profit organization that assesses and rates companies on their disclosure of climate change information. In FY2015, NRI was entered on CDP's climate disclosure leadership index (CDLI) for that year. In FY2019, NRI was selected as a "Climate Change A List" for the first time, as well as being certified as the "Leader Board", the highest rating in "Supplier Engagement Rating".

KPI	unit	FY2015	FY2016	FY2017	FY2018	FY2019

► Environmental policy

Environmental policy

We have established the NRI Group Environmental Policy and Biodiversity Action Agenda for all NRI directors and employees.
To ask its business partners, such as external contractors and suppliers, to engage in activities that take into consideration the environment, social and governance (ESG), NRI has a procurement policy containing the clause "practice of ESG procurement."

Applicable scope

All directors, officers and employees of NRI Group

► Environmental management system

Environmental management structure

At the direction of the President & CEO, the NRI Group has formed the Sustainability Activities Committee as organizations responsible for sustainable operation, including climate change issues, and presents sustainability initiatives and management proposals to the Senior Management Committee and the Board of Directors several times during the fiscal year.

Officer in charge

Kenji Yokoyama
Senior Corporate Management Director

Responsible committee

Sustainability Activities Committee

Status of introduction of environmental management system (EMS)

NRI has acquired ISO 14001 certification, an international standard on environmental management systems, for its data centers which are considered to be main sources of CO₂.
As for NRI offices, we are introducing NRI-EMS, an environmental management system unique to NRI, starting from FY2015.
In FY2018, China's Zhiming Group was added to the scope of NRI-EMS, and four new bases were added. We will continue to consider introducing it to other overseas bases.

		unit	FY2019
EMS Coverage (based on CO ₂ emissions)		%	93.7
Data centers	(ISO 14001 introduction rate 100%)	%	72.4
Office	(NRI-EMS introduction rate 84%)	%	19.7
Overseas bases	(NRI-EMS introduction rate 21%)	%	1.6
	Coverage		a

Environmental audit

NRI conducts internal audits several times a year with respect to ISO14001 for its data centers and NRI-EMS for its offices, and is continuously improving by PDCA cycle.

■ Environmental Management - Data

E01D

Environmental disclosure

NRI is promoting the proactive disclosure of environmental information, mainly through its Sustainability Activities Committee.

Since FY2014, we have also acquired environmental information assurance from third-party organizations, and are endeavoring to provide highly accurate environmental information in accordance with international standards such as GHG protocols.

Through these activities, we were selected for the 2015 Climate Change Leadership Index (CDLI) by CDP, an international non-profit organization that assesses and evaluates information on climate change disclosures.

In FY2019, NRI was first selected on the "Climate Change A List" and was certified as the "Leader Board" with the highest rating in "Supplier Engagement Evaluation".

Environmental training

NRI has been pursuing NRI Green Style activities in order to raise environmental awareness of each director and employee, as well as engage in business operations that are environmentally friendly. In FY2019, we produced an ESG learning video for an ESG (environmental, social, governance) e-learning test and deployed it internally, and activities to participate in forest improvement activities* in Tadami Town, Fukushima Prefecture, which have been continuously implemented since FY2016, and in Takao Forest, Hachioji City, Tokyo.

We carried out family participatory environmental experience activities at the Natural School.

Moreover, we designated ESG as an important assessment target in an internal incentive scheme titled "Dream up the Future Award", a scheme intended to spotlight activities that contributed to establishing and developing the NRI Group as the "Company Creating Future Society".

	unit	FY2015	FY2016	FY2017	FY2018	FY2019

Climate Change - Data

► Governance for climate change

Governance system

Officer in charge

Kenji Yokoyama, Senior Corporate Management Director

Responsible committee

Sustainability Activities Committee

Incentives for management on climate change

To ensure certain operation of the NRI Group environment management system, NRI encourages employees to obtain various external qualifications related to climate change such as ISO14001 internal auditor and energy manager qualifications. For employees who obtain such qualifications, the NRI Group provides examination fees and also recognizes their achievement in employee performance assessments. To realize the NRI Group corporate statement "Dream up the future," NRI has a program for commending employees who contribute to enhancing the prestige of the NRI Group and achieving its vision every year. This program recognizes not only employees who are involved in activities to disseminate information for social recommendations and the development of new business and technologies but also employees who contribute to improving corporate value through ESG (environmental, social, governance) and sustainability activities.

Risk management on climate change

The NRI Group defines the possibility of detriment to the Group's capital due to an unforeseen circumstance that occurs in business operations, or something that prevents the preservation or improvement of enterprise value due to a phenomenon that hinders business operations as business operational risk.

The NRI Group has appointed a Risk Management Director and established a Risk Management Supervisory Bureau in order to establish an internal controls system and aim for continual improvement.

Furthermore, at the direction of the President & CEO, the Integrated Risk Management Committee has been established and conducts appropriate inspections of the status of the entire company's internal controls.

The Integrated Risk Management Committee reports several times a year to the Board of Directors.

Supervisory bureaus have been established for each of the main risks that accompany business activities, and when necessary, deliberations take place at specialist meetings, with the supervisory bureaus taking measures for appropriate responses in collaboration with business departments.

With respect to responding to ESG issues, including climate change risk, in addition to the Integrated Risk Management Committee and at the direction of the President & CEO, the Sustainability Activities Committee, which mainly promotes sustainable management, and the NRI Value Co-Creation Committee, which promotes CSV (Creating Shared Value) operation, have also been established.

These three bodies work in a triangle-structure to promote and engage in management strategies for not only ESG risks, but also ESG opportunities.

With respect to climate-related risks (including business continuity risk due to a natural disaster or similar), the Sustainability Activities Committee, which has responsibility for business-foundational ESG, undertakes management to control the impact of the burden on society. The NRI Group has identified the materialities on which it should engage, and one of the 4 materialities is "the creation of a future society with a low environmental burden."

In alignment with the relevant materialities, climate change risk is managed by setting and publishing external environmental targets for each of the themes of "response to climate change," "sustainable energy consumption," "environmental responsibility and preservation," and "supply-chain environmental consideration."

Furthermore, as foundational climate change management, PDCA has been implemented, with ISO14001 introduced in all 5 data centers and NRI's original environment management system (NRI-EMS) introduced in major offices.

Response to CDP

Since 2015, NRI has responded to a survey by CDP, an international nonprofit organization that assesses and ranks corporate climate change disclosures. In 2015, NRI was named to the CDP's Climate Disclosure Leadership Index (CDLI) for that year.

In FY2019, NRI was first selected as a "Climate Change A List" company.

In addition, we have been evaluated for our commitment to climate change with our suppliers, and have been recognized as the "leader board" with the highest rating in the "Supplier Engagement Assessment".

Climate-related risks

Risks due to changes in regulations

The world has accelerated towards zero-emission. The government of each country including Japan has started discussion on introducing and strengthening carbon pricing.

However, the amount of renewable energy generation in Japan is currently in the 10% range. Even with 22-24% which is the government's target of energy mix of power sources in 2030, the amount of renewable energy generation is not as high as what other countries generate.

It is predicted that Japan will be relying on fossil fuels to some extent.

Therefore, if a high carbon tax, as expected by the IEA, is introduced to realize long-term targets for emission reduction, Japan's electricity prices are expected to rise, and the NRI Group, which owns data centers, also costs risk of increasing.

In addition, IT companies in the United States and Europe are turning to zero-emission, which we believe to be a competitive risk.

Therefore, the NRI group joined RE 100 and is working on securing all electricity with renewable energy in 2050.

Risks due to physical impacts

In the NRI Group's business (consulting, system development), personnel costs are the highest of the cost of sales.

Therefore, if climate change occurs and the number of working days decreases due to heavy rain or intensifying typhoons, new personnel will be needed. Increasing of the labor costs would be a risk for the NRI Group.

In addition, the NRI Group has been increasing its workforce in emerging countries such as India.

If the temperature rises and the risk of infectious diseases increases, there is a risk that the cost for promoting the health of employees will increase as a whole company.

In response to the above, NRI is working to reduce risks by actively relocating offices and introducing telework as measures to strengthen BCP.

Climate Change - Data

E02D

Climate-related opportunities

Climate-related opportunities

The NRI Group has provided Shared Service which could significantly reduce power consumption, CO₂ emissions, and costs by sharing the same system among multiple companies.

In addition, as the NRI Group joined RE100, it has set a goal of achieving a 36% renewable energy utilization rate by FY2030 and 100% by FY2050.

Such low carbon and zero-emission services are expected to increase demands in the future, and we believe that this will be a business opportunity for the NRI Group.

Action to mitigate climate change

Mitigating climate change through products and services

Shared Online Services:

Amid concerns over rising power usage by the IT services industry as a whole, NRI has formulated a business plan intended to reduce power usage by the IT activities of the entire value chain, including client companies. Specifically, growing NRI's shared online service revenues will likely serve to curb the carbon dioxide emissions of society as a whole.

Data indicates that using NRI's shared online service can allow our clients to cut their CO₂ emissions by around 70%, compared to if they build and operate their own systems independently.

	unit	FY2015	FY2016	FY2017	FY2018	FY2019

	Emissions per floor area		t-CO ₂ /m ²	–	0.05	0.07	0.07	
	Emissions per employee (A)		t-CO ₂ /person	–	0.45	0.54	0.59	
Yokohama Minato Center (Dia Building)			unit	FY2016	FY2017			
OUTPUT	Total heat from energy resources		1,000GJ	77	51			
	Greenhouse gas emissions		t-CO ₂	3,963	2,537			
	Emissions per floor area		t-CO ₂ /m ²	0.12	0.14			
	Emissions per employee (FY2017 : B)		t-CO ₂ /person	1.02	1.13			
Comparison between Yokohama Nomura Building and Dia Building			unit	FY2016	FY2017	FY2018	FY2019	
OUTPUT	Improvements in emissions per employee ((A-B)/B)		%	–	-60.6	-51.9	-47.8	

Notes 1. When conducting the environmental assessment on the Yokohama Nomura Building, a comparison was conducted with the Yokohama Dia Building that was the main transfer source.

Notes 2. Emissions per employee is calculated based on the standard use area per person of 2.5 tsubo (8.3m²) that is prescribed as the office standard for NRI.

Notes 3. Because the energy resources for the Yokohama Nomura Building are electricity, city gas, and cold water and heat, "total heat", "greenhouse gas emissions", "emissions per floor area", and "emissions per employee" are calculated based on these resources.

Material issues of NRI related to this management approach

"Diversity of human resources" and "Sound hiring practices and labor-management relations"

NRI's approach to material issues

The NRI Group believes that employees respecting each other's diverse values is the cornerstone of a workplace environment where employees can continue to work happily, sound in both mind and body, and that this is indispensable to the company's sustained growth, as it brings about improvements in the productivity and creativity of individual employees and the organization as a whole. In addition, the NRI Group has expanded its overseas business, and one in every four employees now works overseas.

Therefore, we promote diversity management in line with international social norms so that our value-diverse employees can become established and active in the NRI Group irrespective of their race, ethnicity, nationality, birthplace, social status, social origin (place of birth), gender, marital status, age, language, disability status, health status, religion, thought, belief, property, sexual orientation. Regardless of gender identity and differences in job types and employment types.

In addition, in order to transform this into growth potential for the company, we are working to create an environment in which employees can demonstrate their abilities fully while also valuing their own health and family life by reducing long working hours and improving work-life balance so that employees can demonstrate their creativity.

In terms of recruitment, too, each individual's various abilities, expertise, and skills are appropriately assessed and decisions made without discrimination based on gender or similar.

In addition to the regular yearly recruitment of new graduates, recruitment is ongoing throughout the year for midcareer hires and opportunities for persons with disabilities. When giving an explanation about the company during hiring, we disclose factual information based on the concept of "RJP" *.

* RJP: an abbreviation of "Realistic Job Preview." Recruitment activity carried out using the idea of communicating to job applicants the truth about both the good and bad aspects of the work, its environment, and the corporate culture.

■ Labor Practices, Diversity - Management Approach

Priority activities / Medium- to long-term targets

The NRI Group has established the following objectives and is promoting initiatives related to diversity and inclusion.

[Action plans under the Act on Promotion of Women's Participation and Advancement in the Workplace]

(Target: NRI) Term: April 2019 to March 2023

- | | |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Goals | <ol style="list-style-type: none"> 1. Increase the percentage of female managers to at least 8.5% of all NRI managers by the end of FY2022 (appoint no less than 100 additional women to managerial positions). 2. Increase NRI's female employee hiring rate to at least 30% of its total recruitment. 3. Further heighten management's awareness of diversity management. |
| Initiatives | <ol style="list-style-type: none"> 1. Continue the Leader Development Program for female employees with the goal of developing them into managers. 2. Persist with measures to attract more female student job applicants. 3. Heighten management's awareness of their responsibilities from managerial and employee development perspectives with respect to diversity of employee characteristics and values. 4. Carry out system reforms aimed to allow all NRI employees to select diverse work style options. |

In addition, we have also established the following objectives and are promoting initiatives related to supporting work-life balance.

[5th Term Action Plan based on the Act on Advancement of Measures to Support Raising Next-Generation Children]

(Target: NRI)

- | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Goals | <ol style="list-style-type: none"> 1. Promote use of childcare-related systems while facilitating improvements that make them easier to use. 2. Develop a workplace culture that enables diverse talents to flourish, and strive to make improvements in that regard. 3. Further improve the working environment to bring about more satisfactory work-life balance. |
| Initiatives | <ol style="list-style-type: none"> 1-1. Support employees returning to work by promoting operations of the in-office nursery school that opened in June 2017. Also, hold regularly scheduled explanatory sessions regarding the nursery school. 1-2. Encourage use of childcare-related systems for male employees through ongoing efforts to publicize and provide information on such systems (partner childbirth leave and childcare leave for male employees). 1-3. Gain a quantitative and qualitative understanding of circumstances surrounding use of the childcare-related systems and employee preferences in that regard, through questionnaires, interviews and other such means to consider improvement measures. 2-1. Prevent harassment related to matters such as childcare and nursing care by regularly implementing employment hierarchy-specific training programs and continue efforts to heighten awareness in that regard. 2-2. Support employees taking care of children and those who have returned to work by providing them with greater opportunity to plan their careers. To such ends, continue to engage in initiatives to support work-life balance, encompassing elements such as training and interviews enlisting supervisors together with employees who are expecting and those who have returned to work after having taken childcare leave. 2-3. Develop a workplace culture conducive to employees who are expecting and those who have returned to work after having taken childcare leave by instilling manager awareness in that regard through training and other such initiatives. 2-4. Promote greater understanding of diversity by carrying out initiatives that include training sessions and round-table discussions transcending generational divides and job titles. 3-1. Promote flexible working styles such that include telecommuting and utilizing various IT tools. 3-2. Encourage employees to take paid leave through campaigns and other such initiatives. |

* Since we received "Platinum Kurumin Special Exception" from August 2018, instead of formulating an action plan, we announced the implementation status of next-generation upbringing support measures to the Ministry of Health, Labor and Welfare "Holding place for supporting work-life balance".

■ Labor Practices, Diversity - Management Approach

Progress / Achievements / Challenges

NRI has been selected as a "Nadeshiko Brand" for the third consecutive year since 2016 as a listed company excellent for promoting female career.

The "Nadeshiko Brand" is a joint initiative by the Ministry of Economy, Trade and Industry and the Tokyo Stock Exchange, and introduces listed corporations that excel in encouraging the empowerment of women as an attractive brand for investors who focus on "enhancing corporate value in the medium- to long-term," and promotes investment alongside initiatives by the companies.

In addition, NRI was recognized by the Minister of Health, Labour and Welfare as a company that showed excellence in implementing initiatives encouraging the empowerment of women, receiving Top-Rank Eruboshi Certification (Stage 3). This certification system is based on the Act on Promotion of Women's Participation and Advancement in the Workplace that came into effect in April 2016, and evaluated NRI's achievements in each of the categories of: 1. Recruitment; 2. Continued employment; 3. Work-style, including hours, etc.; 4. Ratio of women in managerial positions; and 5. Career-path variety.

▶ Employment of persons with disabilities

Promoting employment of persons with disabilities

Assurance

NRI has been actively working to recruit persons with disabilities. At NRI Mirai, Ltd., a special subsidiary of NRI, Health Keepers (visually-impaired corporate physiotherapists) fulfill their duties by providing relaxation services to NRI Group employees at massage rooms in place at principal offices. Office Supporters, comprising of mentally impaired persons, work actively to provide training assistance, digitize documents, deliver internal mail, keep office space in order and look after equipment and fixtures, among other diverse activities. We will continue to promote workplace participation of persons with disabilities by discovering further employment opportunities for them.

▶ Promoting diversity and inclusion

Promoting diversity and inclusion

NRI's Diversity & Inclusion promotion activities began with the "NRI Women's Network (NWN)", an activity for promoting women's advancement that started in FY2008.

Currently, we are engaged in various types of diversity such as differences in careers / specialties, generations, lifestyles such as childcare / nursing / health, and understanding of disabilities / SOGI / cultural differences.

From FY2018, we hold a Diversity & Inclusion Seminar once a year for department managers to explain the necessity of diversity management directly from top management and the importance of communication to promote inclusion.

■ Labor Practices, Diversity - Data

Promotion of Women's Participation and Advancement

Since FY2008, NRI has been expanding the activities of the NRI Women's Network (NWN), which are based on the three pillars of "support for female employees in developing their careers," "support for balancing work and parenting," and "fostering a better corporate culture."

Rising ratios of female employees and women continuing to work have become the norm, and in recent years NWN activities have focused on "a more professional approach broadening one's career and continuing to play an active role."

We formulated an action plan based on the Act on Promotion of Women's Participation and Advancement in the Workplace, and in FY2016 we started a Leader Development Program and Career Design Seminars to support women's career development.

We are also continuously working on childbirth and childcare initiatives, and are proactively encouraging not only the employee undergoing the life-event, but also their supervisor, including through three-party interviews aimed at pregnant employees and their supervisors, training to support balancing work and childcare attended by employees who have returned from childcare leave and their supervisors as a pair, and our "Support for Balancing Work and Childcare Guide Book for Supervisors."

Thanks to these initiatives, NRI has continued to be selected for the "Nadeshiko Brand" since 2016 as a listed corporation that excels in encouraging the empowerment of women. The "Nadeshiko Brand" is a joint initiative by the Ministry of Economy, Trade and Industry and the Tokyo Stock Exchange, and introduces listed corporations that excel in encouraging the empowerment of women as an attractive brand for investors who focus on "enhancing corporate value in the medium- to long-term," and promotes investment alongside initiatives by the companies. In addition, NRI was recognized by the Minister of Health, Labour and Welfare as a company that showed excellence in implementing initiatives encouraging the empowerment of women, receiving Top-Rank Eruboshi Certification (Stage 3). This certification system is based on the Act on Promotion of Women's Participation and Advancement in the Workplace that came into effect in April 2016, and evaluated NRI's achievements in each of the categories of: 1. Recruitment; 2. Continued employment; 3. Work-style, including hours, etc.; 4. Ratio of women in managerial positions; and 5. Career-path variety.

In addition, NRI was included in the "MSCI Japan Empowering Women Index" in July 2017. This index is one of the three ESG indices selected for passive operation by the Government Pension Investment Fund (GPIF).

MSCI Japan Empowering Women Index (WIN)

THE INCLUSION OF Nomura Research Institute, Ltd IN ANY MSCI INDEX, AND THE USE OF MSCI LOGOS, TRADEMARKS, SERVICE MARKS OR INDEX NAMES HEREIN, DO NOT CONSTITUTE A SPONSORSHIP, ENDORSEMENT OR PROMOTION OF Nomura Research Institute, Ltd BY MSCI OR ANY OF ITS AFFILIATES. THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES AND LOGOS ARE TRADEMARKS OR SERVICE MARKS OF MSCI OR ITS AFFILIATES.

Labor-management consultation on diversity & inclusion

Through informal gatherings and group negotiations with the Nomura Research Institute Labor Union, NRI continues to engage in dialogue both regularly and irregularly on topics related to its compensation and treatment, personnel system, and work environment. These dialogues also include discussions on important matters concerning diversity management.

■ Labor Practices, Diversity - Data

▶ Long-term incentives

Long-term incentives for employees

In order to avoid a bias toward improvement of short-term performance, NRI has introduced an incentive system to improve long-term motivation, which includes an NRI Group employee stock ownership system, our Employee Share Holding Incentive Plan, and our retirement allowances (defined-benefit corporate pension and defined-contribution pension).

NRI Group employee stock ownership plan

This is an employee benefits system in which employees of the NRI Group (NRI and its consolidated subsidiaries) use a self-determined amount of their salary and bonus to regularly purchase shares in NRI, supporting the creation of medium to long-term assets. Employees are awarded an incentive in the form of NRI shares amounting to 10% of their contribution.

In addition, the holding of NRI shares also serves as an incentive system to increase motivation to improve the performance of the NRI Group.

In addition, dividends are re-invested in purchases of NRI shares after tax is subtracted.

Ratio of the number of shares held by the Shareholding Association to the total number of NRI issued shares excluding treasury stock:

4.81% (as of March 31, 2020)

Trust-type employee holding incentive plan

In order to provide incentives for raising NRI's corporate value over the medium and long terms, and further expand employee benefit packages, NRI adopts the Trust-type Employee Stock Ownership Incentive Plan.

The Plan is an incentive plan for all of NRI Group's employees participating in NRI Group Employee Stock Ownership Group. For the Plan, NRI has set up the specific trust (the Trust) for the Stock Ownership Group with a trust bank.

The trust will take out loans to purchase in advance in amount of NRI's stock that is expected to be purchased by the Stock Ownership Group over the following 4 years. After that, the Trust will continuously sell the NRI stock to the Stock Ownership Group.

IF a substantial amount of funds from the sale of NRI stock remains in the Trust at the time it is terminated, the funds will be distributed to qualified beneficiaries as residual assets.

As a result, employees will benefit from the rise in NRI's stock price over the four-year period that is a trust period, which is an incentive for medium- to long-term performance improvement.

▶ Employee satisfaction

Employee survey

NRI takes a multifaceted approach to assessing employee awareness, such that mainly involves gauging employee satisfaction using three methods.

Such initiatives target all NRI employees working in Japan and overseas, and the method with the shortest cycle is conducted on a semi-annual basis.

Internet surveys are the primary means of assessment. The items surveyed include job content, remuneration, work-life balance, career support, employee benefits, work environment, work flexibility, and overall satisfaction.

The survey results act as a basis for planning human resource policies and are posted on the company intranet to serve as feedback to employees.

Employee survey results*1	unit	FY2015	FY2016	FY2017	FY2018	FY2019
Employee satisfaction*2	%	60.3	–	80.5	–	81.8
(breakdown) male	%	60.7	–	80.3	–	81.7
female	%	58.6	–	81.1	–	82.4
Percentage of employees surveyed*3	%	60.3	–	51.4	–	51.9
(breakdown) male	%	81.0	–	81.3	–	80.6
female	%	19.0	–	18.7	–	19.4
Coverage		d		d		d

*1 The 4 points-scale of the survey is "satisfied", "rather satisfied", "rather dissatisfied", "dissatisfied". (It was 5 points-scale until last survey in FY2015.)

*2 The percentage of the survey results above is the proportion of answers of "satisfied" and "rather satisfied".

*3 Data coverage shows the percentage of subjects surveyed (=NRI employees working in Japan) to the total number of NRI group's employees on a consolidated basis.

■ Labor Practices, Diversity - Data

▶ Work-life balance

Work-life balance supports

NRI has established a system covering durations of pregnancy and childcare that is more comprehensive than that prescribed by the Child Care and Family Care Leave Act.

Shorter working hours and exemptions/limits on overtime because of childcare are available up until the end of the academic year for a child's third year of elementary school.

Meanwhile, these options can be combined with other independent systems, such as shift work or work with selectable start/finish times. We have been working on initiatives to establish an environment for achieving continued balance, including introducing a "Partner Childbirth Leave System" in FY2016 for employees with partners about to give birth, and opening nurseries in our offices in FY2017.

In addition to establishing systems, we are also focusing on providing information and examples to help employees select relevant systems in accordance with individual circumstances.

We are also proactively encouraging a balance between work and childcare for employees, through initiatives such as three-party interviews geared to pregnant employees and their supervisors, and training to support balancing work and childcare attended by employees who have returned from childcare leave and their supervisors as a pair.

In addition, we provide information through regularly held nursing seminars and our nursing-care concierge desk.

NRI has been recognized as a corporation that supports child rearing based on the Act on Advancement of Measures to Support Raising Next-Generation Children, having received the certification mark (nicknamed "Kurumin") since 2007.

In addition to having gained the certification for five consecutive terms, in 2018 we also received the "Platinum Kurumin" special certification granted to companies that carry out initiatives which meet even higher standards.

Utilization of work-life balance support system	unit	FY2015	FY2016	FY2017	FY2018	FY2019

▶ Support for diverse and flexible working styles

Measures to support diverse and flexible working styles

For specialist professions, NRI employs a discretionary labor system in which work formats and hours are to be self-managed at the discretion of the person in question. We furthermore aim for further efficiency and productivity improvements with respect to work accomplishments in specialist professions.

In addition to discretion in terms of time, this has involved putting in place a system to also allow a certain amount of discretion in terms of location, making it possible to schedule work from home or a satellite office up to a limit of 100 days per year.

Moreover, in Sapporo and Fukuoka we recruit for local positions that are based on the premise of working in those locations.

In FY2018, we introduced educational opportunities on a company-wide basis through the Coursera online learning platform, thereby enabling our employees with diverse and flexible working styles to work toward self-study at their own pace regardless of time or location.

Establishment of in-office nurseries

In order to support our employees returning to work at their desired timing and the development of their career plans, in June 2017, we opened the Yumeminato Hoikuen as NRI's first in-office nursery, in the Yokohama Center (Yokohama Nomura Building).

Creation of a system to encourage men's participation in housework and childcare

In January 2017, we introduced partner childbirth leave and established a system that makes it easier for our male employees to proactively participate in childcare.

In addition to making the "Support for Balancing Work and Childcare Guide Book for Men" available to all of our employees, we have otherwise been promoting greater understanding of the company's systems relating to childcare by conducting briefing sessions introducing our in-house systems and also providing information containing child-rearing advice of our male and female employees currently raising children. We also hold round-table discussions carried out by our male employees who have taken childcare leave.

Enhancement of measures to support employees returning to work

Three-party interviews aimed at pregnant employees and their supervisors have been taking place throughout pregnancy periods since FY2011.

We support a smooth return to the workplace by deepening understanding of the internal systems and discussing post-return working styles.

Since FY2010, we have continued to provide training to support balancing work and childcare after an employee returns from childcare leave, which includes guidance for both female employees and their supervisors.

In FY2016, we further strengthened our support, commencing "Follow-up Seminars on Balancing Work and Childcare" for employees who had undergone training to support balancing work and childcare 1-2 years earlier.

Encouragement of the taking of paid leave

We have been encouraging employees to schedule consecutive days off, including hot-weather leave and revitalization leave.

Since FY2016, we have been achieving a rate of paid vacation days taken of not less than 70%.

Telecommuting system

NRI has had a system in place for some time whereby an employee can work at an NRI office that is different from their usual place of work.

In March 2016, we introduced a telecommuting system to further improve the efficiency of our operations and increase productivity.

We have also been holding campaigns promoting use of the system. In FY2017 and FY2018, NRI was a special participant in the "Telework Days" event implemented by six ministries including the Ministry of Internal Affairs and Communications, in collaboration with the Tokyo Metropolitan Government and the business community.

A total of approximately 6,000 employees engaged in telecommuting during the five days of the event, and since that time more than 1,000 employees have been making use of telecommuting arrangements every month.

Satellite offices

NRI's main offices have "liaison centers" which are made available as satellite offices for workers with no desks at those locations.

We also have contractual agreements with satellite offices of outside entities in order to provide our employees with efficient and flexible work arrangements.

Casual wear

With the objective of increasing productivity by encouraging flexible ideas from relaxed attire, the NRI Group has allowed employees to work in casual wear since 1996, under guidelines such as "wearing a business suit if you are likely to meet clients."

In addition, since 2011, in the interests of power conservation we have relaxed the guidelines for casual wear during the Cool-Biz period from May to September, including not requiring ties to be worn in front of clients.

Material issues of NRI related to this management approach

"Sound hiring practices and labor-management relations" and "Dialogue with civil society"

NRI's approach to material issues

At the NRI Group, highly specialized personnel are major operational resources. If a situation in which employees are unable to fully demonstrate their ability in a sound environment due to substandard occupational health and safety occurs, there is a risk that business services, such as the information systems that are important foundations for supporting society, and the provision of consulting services that are deeply involved in client operations and businesses, will be impacted due to the lower productivity and quality of deliverables.

Accordingly, since FY2015, NRI has been aiming to realize "Health and Productivity Management[※]," which contributes to improving the Quality of Life (QOL) of employees and is striving towards achieving its goals based on the NRI Health Declaration 2022.

Healthy Operations considers the management of employee health in terms of managerial perspective and strategic implementation.

The health of our employees also occupies an important position from the standpoint of the company's risk management, and we will try to proactively engage in health management as a company instead of entrusting it to individual employees.

It is extremely important for both the individuals concerned and the company that employees are healthy, and Healthy Operations will bring an injection of energy into the organization in the form of active employees and improved productivity by actively pushing employees to become healthy based on that philosophy, which as a result is expected to lead to improved business performance and corporate value.

[NRI Health Declaration 2022]

Basic policy: Based on correct knowledge and recognition for their own health by each employee, the NRI Group supports active initiatives for improving long-term quality of life (QOL).

NRI is leveraging employee feedback gathered through surveys and from employee unions and is proactively working to improve employee working hours, health conditions, and the workplace environment.

Priority activities / Medium- to long-term targets

NRI prioritizes the following issues in its management of occupational health and safety issues:

1. Complying with laws and regulations on overtime work and holidays.
2. Eliminating long hours worked consecutively.
3. Ensuring that employees working long hours get seen by the occupational health physician (OHP), and having them comply with doctors' instructions.
4. Reducing the amount of night work that employees perform.
5. Pressing employees to take their paid leave, including ensuring that they are organized and disciplined about taking extended consecutive periods of leave (such as a summer break, and "recharge leave").

In addition, we set goals for the following four items on health management.

- 1 Reduce lifestyle-related diseases
 - Manage employees' reservations and receipts for medical check-ups and health examinations, and encourage them to take these examinations
 - Put in place health management rooms at our principal offices and build a framework for industrial doctors to handle cases
- 2 Lower stress
 - Stress prevention for individual employees and teams
 - Develop a system to enable employees to return to work earlier
- 3 Lower smoking rate
 - Introduce support to help stop smoking
 - Remove smoking spaces inside the office
- 4 Promote work-life balance
 - Reduce overtime and holiday work hours
 - Encourage employees to take paid leave
 - Implement the frontline-driven Smart Work-Style Campaign (SWC) including: streamlining operations and meetings, as well as promoting early morning work

Occupational Health and Safety - Management Approach

Progress / Achievements / Challenges

Nippon Kenko Kaigi[※] certified NRI as an Excellent Enterprise of Health and Productivity Management (White) acknowledging the Company as a large corporation participating in superior health and productivity management.

Started in FY2016, this certification scheme reviews companies for their business philosophy, organizational structure, system and initiative execution, assessment and improvement, compliance and risk management.

NRI acquired this certification for the second consecutive year in FY2016-2019 as it met certification requirements in the Large Corporation category, which applies to large-sized corporations and medical corporations.

※ An entity that aimed to bring about specific action plans in the workplace and local communities, with the goal of realizing excellence on health and productivity management. This is a collaboration between municipalities and private organizations such as business groups, medical associations and the insured.

▶ Occupational health and safety

Occupational health and safety policy

One of the NRI Group's core policies is to provide its employees with safe, sound workplace environments.
We spare no effort in initiatives to manage our employees' working hours, for putting in place proper workplace environments, and for managing our employees' individual health.

Occupational health and safety structure

NRI has established a health and safety committee and has established a sanitation management system in each business division with the aim of achieving an appropriate working environment.
With these arrangements we are properly maintain the working environment according to the business and characteristics of each business division.

Officer in charge

Chief Occupational Health and Safety Officer
Hidenori Anzai
Senior Corporate Management Director

Chief Health Officer

President & Chief Executive Officer (CEO)

Responsible committee

Health and Safety Committee

Status of labor-management consultations on occupational safety and health

Through informal gatherings and group negotiations with the Nomura Research Institute Labor Union, NRI continues to engage in dialogue both regularly and irregularly on topics related to work environment and so on.

Risk management on occupational health and safety

A workforce of professionals in possession of high expertise is a principal management resource for the NRI Group.

Should it happen that owing to an occupational health and safety issue an employee cannot exploit the full potential of their abilities in a sound workplace, the resulting drop in productivity and/or poorer quality of outcomes may impact on our delivery of the information systems that are important foundations underpinning the society, or of the consulting services that play an important part in our clients' management and businesses.

To avoid such a situation, NRI prioritizes the following issues in its management of occupational health and safety issues:

1. Complying with laws and regulations on overtime work and holidays.
2. Eliminating long hours worked consecutively.
3. Ensuring that employees working long hours get seen by the occupational health physician (OHP), and having them comply with doctors' instructions.
4. Reducing the amount of night work that employees Perform.
5. Pressing employees to take their paid leave, including ensuring that they are organized and disciplined about taking extended consecutive periods of leave (such as a summer break, and "recharge leave").

We have mechanisms in place to accurately monitor our employees' hours worked. At any time, supervisors can check online the hours that the employees in their charge are working, or the amount of leave that they have taken. In addition, managers are sent a list of employees who performed night work or holiday work the day after it has happened.

Furthermore, we are grasping the risks by thoroughly conducting industrial physician interviews with long-time workers.

Occupational Health and Safety - Data

Health and productivity management

Overview of health management

The NRI Group is comprehensively engaged in the maintenance and improvement of employee health, including the promotion of regular checkups and follow-ups on the results, engagement by industrial physicians, the establishment of consultation desks, and the reduction of overtime work.

Promotion of medical checkups / comprehensive physical examinations

The NRI Group regularly instructs all employees to undergo a medical examination (for those under 30 years old) or a comprehensive physical examination (for those 30 years of age or older) every year, and checks whether they have or not.

In addition, We also instruct employees who work late into the night to have a health examination every six months and check the status of the medical examination.

Establishment of office health-care rooms and engagement by industrial physicians

NRI has established health-care rooms in its main offices, and has in place a proper system for industrial physicians to engage with cases.

Industrial physicians check the results of employee medical examinations and comprehensive physical examinations, as well as responding to health consultations from employees.

Stress checks based on the Health and Safety Act

From FY2016, based on the Industrial Health and Safety Act, the NRI Group introduced a web questionnaire-type stress-check to prevent employees from becoming unwell in terms of their mental health.

This has encouraged employees to notice their own stress situations and talk to an industrial physician if they need to.

In addition, we collate and analyze stress-check results for each organization and use the information to improve the working environments.

Moving forward, we will continue to implement the program every year in accordance with laws and regulations.

Consultation desk for work problems

The NRI Group has established various PraNet (Professional Assist Network) consultation desks for employees, and is equipped with a system that can respond to all kinds of issues employees may have. In addition to the consultation desks within the company, we have several company-external consultation desks available to handle a diverse range of counselling, including consultations about work and the workplace overall, consultations on career-development and skill-development, counseling on workplace stress and health, counseling on family health and care, consultations about ethics and compliance, consultations concerning harassment.

Occupational Health and Safety - Data

Reduction of overtime and holiday work

NRI has established internal management standards for working hours, late-night work, and holiday work based on labor laws, etc., and engages in proper labor management.

We have established a system that enables a correct understanding of employee work status, including a system that enables supervisors to check online at any time the working hours of their subordinates and how much vacation time they have taken, and the distribution of a list of employees who engaged in late-night or holiday work to management positions on the following day.

In addition, we regularly check the status of each department using indicators such as a "Health Management Index," which is an index of risks such as long working hours that should be eliminated.

Reduced smoking rate

From November 2015, NRI introduced its "Quit-Smoking Support," in which the company pays 70% of the costs for treatment to quit smoking (borne by the individual).

Furthermore, NRI halved the amount of office smoking spaces in October 2015, and closed all smoking areas in its major offices around the World No Tobacco Day (May 31) in FY2016.

KPI of health management	unit	FY2015	FY2016	FY2017	FY2018	FY2019

► Mental health measures

Mental health measures

As measures to safeguard mental health, in addition to reducing late-night work, eliminating continuous long working hours, a thorough system of interviews with industrial physicians for workers who work long working hours, and stress checks based on the Industrial Health and Safety Act, the following initiatives are being implemented.

Establishment of consultation desks for workplace stress

Employees can bring consultations about workplace stress to the health-care rooms (staffed by Industrial physicians and counselors).

In addition, under the health insurance association system, employees can receive counseling via telephone, website, or in person, from a professional psychological counselor (free of charge in certain circumstances).

Obligatory interviews with industrial physicians for workers who work long working hours

At NRI, out of consideration of the impact on the mind and body of employees whose overtime working hours exceed internal standards, any such employees are required to have an interview with an industrial physician.

Stress checks

Since 2016, NRI has implemented a stress check system under the provisions of Article 66, Item 10 of the Industrial Health and Safety Act for the following purposes:

- For employees to deal with stress by knowing their stress status, before too much accumulates
- For employees to get advice from a doctor if they have too much stress
- For the company to take any work-related measures as a result of the interviews
- To make improvements in workplace environments that cause stress

Return to work support program

When employees have been absent due to illness, etc., they are only allowed to return to work after a diagnosis by their doctor and a consultation with an industrial physician.

In the case of employees who have been absent more than a set amount of time, NRI is making efforts to have them undergo re-work training that incorporates training conducted by an external professional organization to prevent any relapse, so as to avoid any further time absent from work.

► Various systems provided by Nomura Securities Health Insurance Association

Nomura Health Dial 24

For health, medical care, nursing care, childcare, or mental health issues, experienced physicians, public health nurses, and nurses are available for free phone consultations at any time of the year, 24 hours a day.

Employees can also avail themselves of a search system that finds nearby medical institutions and medical institutions that provide advanced medical care.

Special medical dial

When an employee or member of their family is diagnosed with a serious illness such as cancer, they are eligible for a service that provides them with a referral for a second opinion or to a specialist medical institution (free of charge in certain circumstances).

Mental health counseling service

They can receive counseling via telephone, website, or in person, from a professional psychological counselor (free of charge in certain circumstances).

■ Human Resources Development - Management Approach

Material issues of NRI related to this management approach

"Diversity of human resources"

NRI's approach to material issues

The NRI Group's corporate philosophy states that "continuing endless challenges with the pride of being a true professional" is our action guideline.

The cornerstone of the NRI Group is its "human assets". In other words, this refers to employees who are professionals possessing advanced expertise, who independently strive to pursue their own goals and are unafraid to innovate and take on difficult challenges.

To achieve objectives of both NRI's long-term management vision "Vision 2022" and the Medium-Term Management Plan, we must have human assets who not only aim to achieve further growth and improve productivity in our existing specialty areas, but who also take on challenges of venturing into unknown areas of business in anticipation of future trends.

To develop such human assets, the NRI Group has been strengthening systems and the business environment for developing hidden talents of highly motivated people and allowing them to produce results on the job.

The Medium-Term Management Plan 2022 approaches human resource management development as a strategic issue under five conceptual themes of the growth strategy encompassing the plan's 1) DX (digital transformation), 2) business platform, 3) cloud, 4) global, and 5) human resources strategies.

NRI will take steps to secure sufficient quality and quantity of human resources needed to help realize objectives of the digital transformation and global strategies in particular.

Priority activities / Medium- to long-term targets

NRI's personnel system is designed to ensure mechanisms and an environment in which diverse professionals are able to play active roles based on the three core pillars of its performance-based salary system, discretionary work system, and personnel assessment and human resources development system.

The personnel assessment and human resources development system is premised on the notion of encouraging employees to pursue expertise and diversify their fields of specialization.

This is based on the belief that by honing their skills in multiple areas of expertise employees become capable of flexibly responding to changes in the business environment in a manner that involves taking a broad-based perspective in collaborating across division lines.

Furthermore, with respect to human resources development, NRI places importance on an organic fusion of three approaches to development: training programs, self-study, and on-the-job training which plays the central role.

NRI believes that providing OJT through work experience is the optimal development tool.

As such, its training programs act as a means of organizing knowledge acquired through such OJT and for deepening understanding.

The training programs are also positioned as means of obtaining knowledge and skills which cannot be acquired through OJT.

Moreover, NRI has also established a system to support self-study for employees seeking to gain qualifications and improve their foreign language skills.

NRI's priority activities entail realizing objectives of its long-term management vision "Vision 2022" and its Medium-Term Management Plan, while furthermore engaging in initiatives which place a focus on "developing core human resources" geared to the next generation along with "developing DX (Digital Transformation) human resources" and "developing global human resources" underpinning the growth strategy of the Medium-Term Management Plan 2022.

■ Human Resources Development - Management Approach

Progress / Achievements / Challenges

Since its establishment as Japan's first private think tank, we have grown into Japan's largest think tank by investing in top-class human resource development of Japanese companies and continuing to develop challenging professionals.

The overwhelming number of official qualifications can be said to be one of the indicators for objectively determining that highly specialized personnel are being developed.

Regarding the training of core human resources, we will strengthen the training of successors, conduct four types of selective training for mid-level employees, managers, section managers, and department managers, as well as strengthen candidates for the next successor.

So far, about 190 managers (since 2002) and about 90 section managers since 2015 revision) have completed the selective training program.

In "DX human resource development," in addition to conventional training tailored to the career fields and career stages, we are developing and implementing new training systems such as AI, analytics, blockchain, UX design, agile, and microservices.

We have also started reskilling education to shift personnel to priority strategic areas.

In "Global human resource development," we carry out practical training programs that incorporate actual experience of international operations in order to develop global business leaders who are active in establishing overseas business foundations.

We will enhance our ability to carry out our work through overseas work experience, such as dispatching to a client company or NRI's overseas base for about one year.

Under the overseas trainee system, more than 300 employees have been dispatched to 29 cities in 18 countries and regions so far, and we plan to further enhance and expand these priority activities.

▶ Human resources development management

Human resources development policy (Focus areas)

We regard our people as an essential management resource of the NRI Group and a wellspring of its added value across the board.

The NRI Group's approach to human resources development entails drawing out talents of ambitious employees and cultivating human assets that are capable of producing results on the job.

Meanwhile, professional initiatives of NRI Group employees are backed by the Group's human resources development framework.

NRI's personnel system is designed to ensure mechanisms and an environment in which diverse professionals are able to play active roles based on the three core pillars of its performance-based salary system, discretionary work system, and personnel assessment and human resources development system.

Of particular importance with respect to human resources development is the notion of organically fusing various aspects of the three elements: 1) on-the-job training, 2) training programs, and 3) self-study.

The lack of any one of those three elements would render it impossible for an employee to achieve growth as a professional.

As such, those three elements combined form the cornerstone of professional development. Of the three elements, OJT provided through work experience is the optimal development tool.

As such, NRI's training programs act as a means of organizing knowledge acquired through such OJT and for deepening understanding.

The training programs are also positioned as means of obtaining knowledge and skills which cannot be acquired through OJT.

Our C&A (Challenge & Act) System acts as a mechanism that effectively facilitates OJT.

Through the system employees are able to confirm and evaluate the extent to which they have achieved their individual targets which are precisely set at half-year intervals through interviews with their supervisors, thereby enabling employees to develop their skills and appropriately gain access to performance evaluations carried out by their supervisors.

This supports the growth of employees according to their respective characters and levels of independence by having them work toward achieving their goals under a supervisor's guidance, while also facilitating communication between supervisors and their subordinates at the regularly scheduled meetings.

The notion of developing human resources who are capable of rapidly addressing changes is crucial in the VUCA (volatility, uncertainty, complexity, ambiguity) and DX (Digital Transformation) eras.

As such, we encourage employees to pursue expertise and diversify their fields of specialization in order to ensure that our personnel assessment and human resources development system functions effectively.

This is based on the belief that by honing their skills in multiple areas of expertise employees become capable of flexibly responding to changes in the business environment in a manner that involves taking a broad-based perspective in collaborating across division lines and spearheading joint development with our customers.

We have a career field system and an in-house certification system which both constitute crucial aspects of our efforts to promote human resources development.

Human resource development program

many options that include e-learning, support for gaining qualifications and foreign language study, opportunities to study abroad, researcher dispatch, and trainee arrangements.

To achieve our long-term management vision ""Vision 2022,"" we are particularly focusing our efforts on: (1) developing core human resources, (2) developing DX (Digital Transformation) human resources, and (3) developing global human resources.

■ Human Resources Development - Data

(1) As for developing core human resources, we implement programs to develop core human resources responsible for growth and business creation of the NRI Group, which mainly involves developing executive candidates, developing capacity of operational management, and developing the ability to create new businesses.

Our selective training for senior management aims to broaden our pipeline of executive candidates with our sights set on the next stage of our long-term management vision ""Vision 2022."" To such ends, the training enlists a curriculum that extensively delves into studies of fundamental knowledge necessary for management personnel.

Meanwhile, the curriculum also entails studies departing from a business perspective centered on profit and loss, with respect to maximizing value by coordinating business segments and optimizing company-wide operations, and also enlists a managerial perspective such that includes striking a balance between the balance sheet and P&L, and multi-stakeholder engagement.

It also entails performing assessments geared to enabling individuals to develop their abilities.

Our selective training for mid-career employees encompasses studies of sophisticated managerial knowledge and the business creation process, thereby departing from career development in terms of practical aspects of business, and also entails offering programs that include leadership in the DX era which is a key element of the growth strategy under the long-term management vision ""Vision 2022,"" and cross-industry exchange that is cognizant of human resources capable of spearheading joint development with our customers.

(2) As for developing DX (digital transformation) human resources, we implement programs geared to developing talent that accelerates our DX strategy, which constitutes one of the growth strategies under our long-term management vision ""Vision 2022.""

This involves establishing venues for studying not only information technology skills but also astute business insights drawing on the latest business use cases with the aim of enhancing capabilities required in the DX era, particularly with respect to AI and analytics, block chain technology, user experience (UX) design, as well as agile software development and microservices.

We lend our support to efforts that include creating forums for our employees conducive to person-to-person networking and activity,

which involves establishing venues for sophisticated studies by coordinating with Japanese and overseas universities as well as outside entities such as the Japan Data Scientist Society.

We are also mounting a strategic transition to adopting a human resources portfolio approach, which is an aim of NRI in the DX era.

This involves implementing reskill education whereby consultants and system engineers who are equipped with conventional abilities extend their fields of activity to the DX realm drawing on their existing skills.

(3) As for developing our global human resources, we implement programs geared to developing business leaders who are capable of playing active roles on the global stage. In that regard, we are focusing our efforts particularly on our overseas training system under which we send our employees to overseas locations of our corporate customers who operate globally for periods of about one year, thereby enabling such employees to gain first-hand experience in global business.

We also offer overseas study programs in order to expose employees to a wide range of teachings and insights, while enabling them to gain sophisticated professional skills.

Under such programs, employees learn about international standards of corporate management by acquiring MBA degrees at overseas business schools.

Opportunities to earn degrees are also popular, particularly those in computer science (MSE and MCS) and legal affairs (LLM).

Moreover, under our system of short-term training abroad and overseas foreign language study, we send employees to overseas business schools and training institutions so that they can acquire skills necessary for global business.

We also implement training in English that involves study of project management and data science in China and India.

Self-study

Self-development is indispensable for career development and is recommended to employees from various aspects such as consideration for human resources.

For special qualifications closely related to NRI's business, such as information processing engineer, project management professional (PMP), and certified securities analyst qualifications, we will provide preparatory courses for employees and subsidize external training expenses.

We also provide reimbursement and financial assistance to help cover registration costs and examination fees with respect to gaining official qualifications that contribute to our business operations, including certified public accountant and small and medium enterprise management consultant qualifications.

We are also enhancing our support for qualifications related to DX (digital transformation), including those in areas such as statistics, data science, artificial intelligence, cloud computing, and agile software development.

In language studies, we provide employees with a TOEIC test to help them study at a language school.

For language learning, we conduct an in-house TOEIC test and support the cost of employees going to a language school.

We are also focusing on efforts in the realm of self-study making use of massive open online courses (MOOCs) such as "Couseira", "Udemy" and "Gacco" in line with the growing popularity of digital learning.

It is also crucial that we shift to new digital learning approaches in conjunction with progress being made in carrying out work-style reforms.

As such, in addition to making use of MOOCs, we are promoting various reforms with respect to styles of learning in terms of shifting to digital learning environments, shifting to digital communications related to studies, and establishing educational platforms transcending time and space.

The common video streaming platform introduced throughout the company is expanding its opportunities not only for changing training styles, but also for expanding the dissemination of various messages to employees and sharing knowledge and insights accumulated within the company.

Human resources development program

Human resources development program 1

NRI has established 22 career fields with the industry-wide Information Technology Skill Standards (ITSS) in mind in order to better make areas and levels of employee expertise clear in-house and outside the company, commensurate with the actual performance of its employees. In so doing, we have defined seven respective levels of employee expertise.

This system acts as a blueprint for employees to better understand their areas and levels of expertise so that they are able to make improvements when pursuing specializations. It also forms the basis for the C&A (Challenge and Act) system for setting goals and confirming results on a semi-annual basis.

Under the system, employees are encouraged to develop their abilities upon having set goals in multiple career fields.

In addition to pursuing a single specialty, having multiple specialized fields will broaden your horizons and grow into a cross-organizational human resource that flexibly responds to changes in the business environment and leads customers' co-creation.

[Career fields]

1 Corporate Strategy Consultant	12 IT Platform Specialist
2 Business Consultant	13 IT Services Manager
3 Systems Consultant	14 Security Specialist
4 Business Strategist	15 Researcher
5 Sales Representative / Marketing Manager	16 Data Scientist
6 Project Manager (Development)	17 Project Management Specialist
7 Project Manager (Enhancement)	18 Quality Control Specialist
8 Application Architect	19 Business Administration Staff
9 IT Infrastructure Architect	20 Corporate Management / Headquarters Staff
10 Application specialist	21 Systems Engineer
11 Common Application Infrastructure Specialist	22 Consultant

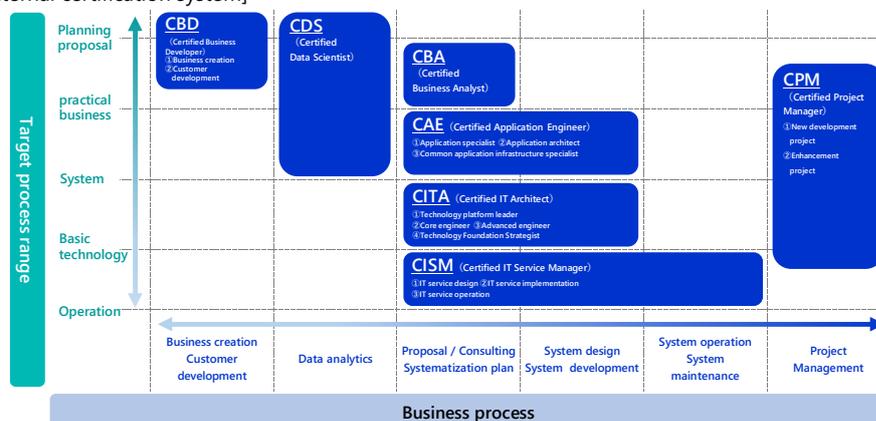

Internal certification system

Through the granting of internal certification (NRI Certification) to employees with high levels of expertise who have refined their skills in career fields, NRI offers professional role models while also promoting the development of core NRI human resources in those fields.

NRI has established seven certifications in 16 areas and employees are able to gain multiple certifications. We review twice a year whether it is suitable as a person representing NRI, including not only ability standards but also business performance.

Candidates for the role models receive OJT through appropriate job assignment and curriculum based training matched to the requirements of each certification.

[Internal certification system]

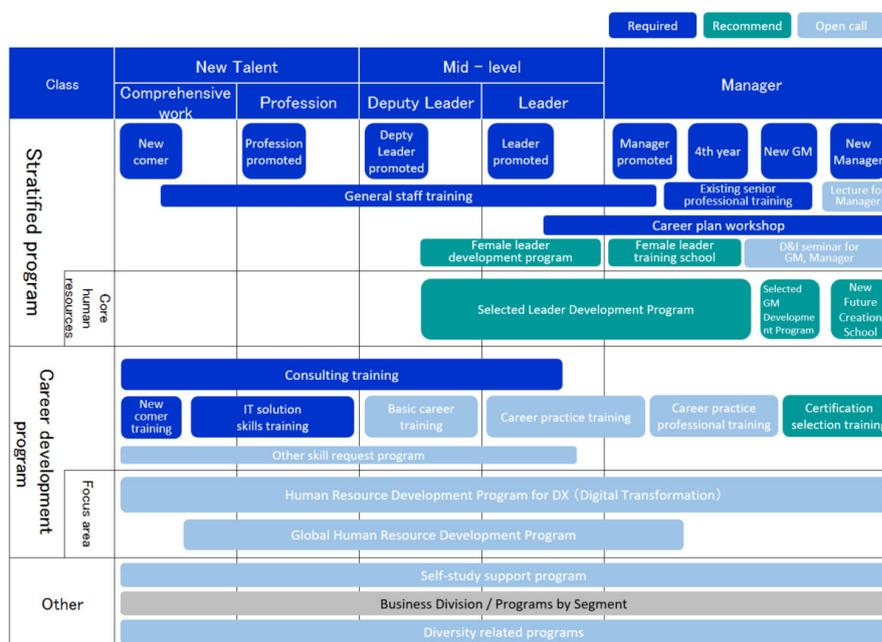

Training program

NRI's training programs implemented company-wide are largely divided into two categories—employment hierarchy-specific training programs and career-specific training programs. In "Level-specific programs", in addition to curriculums by level and position, we continually implement and improve programs such as selective management human resource development, job type curriculum, support for women's advancement, and veteran career development. In "Career-specific programs," we carry out programs in accordance with various training systems. We provide a variety of training programs to meet the diverse needs of employees, conscious of individual skill development along career fields and career development aimed at internal certification. As a priority development based on the long-term management vision "Vision2022", we are also enhancing "Digital Transformation (DX) human resource development" and "Global human resource development".

In addition to its company-wide training programs, NRI's respective business divisions also develop and implement training programs of their own. We have a detailed training development system has been established to cover the businesses and operations of each business division.

[NRI Training Program]

Business impacts

We are promoting the expansion of human resources who promote strategic fields by showing employees the image of human resources, careers, and training programs in line with the growth strategy of NRI's long-term management vision, Vision 2022. In addition, by visualizing the development status and changes over time, we are able to plan long-term human resources strategies, check our human resources portfolio, and develop highly specialized human resources in a short period of time.

Target employee

All employees

Human resources development program 2

Stratified program

The NRI Group implements various training programs according to the career stage.

There are training programs such as promotion of career stage and appointment of positions.

We are implementing a selective training program for each level of employees, from mid-level employees to executives, and are also focusing on the systematic development of management candidates.

In particular, regarding the training for promotion to managerial positions, we have thoroughly reviewed the content since last year.

We are currently considering the content of the training that is unique to our company, and since last year, we have been sequentially revising and implementing each level.

As for new training methods, in addition to the conventional group training, we are also working on online relay training that connects multiple locations in real time.

Furthermore, as a diversity initiative, in addition to a selection program for each layer for female employees, we are also focusing on employee awareness and enlightenment activities through diversity and inclusion seminars.

In addition, veteran employees, such as those in their mid-40s, can show their abilities that they have cultivated so far, and organize their thoughts at regular intervals in order to support their work while challenging new fields and skills. We hold a career plan workshop that allows you to take multiple courses during your career so that you can lead to the next action.

Management Human Resource Development Program

We are implementing a program to develop core human resources who are responsible for the growth strategy and business creation of the NRI Group.

The curriculum of these development programs consists mainly of three elements:

- (1) Courses aiming to develop executive candidates,
- (2) Course aiming to develop candidates for organizational head
- (3) Courses aiming to develop proficiency with respect to managing business drawing on a managerial point of view and a company-wide perspective, and
- (4) Courses aiming to develop the ability to create new businesses.

Our selective training for senior management, particularly that involving courses aiming to develop executive candidates, aims to broaden our pipeline of executive candidates with our sights set on the next stage of our long-term management vision "Vision 2022."

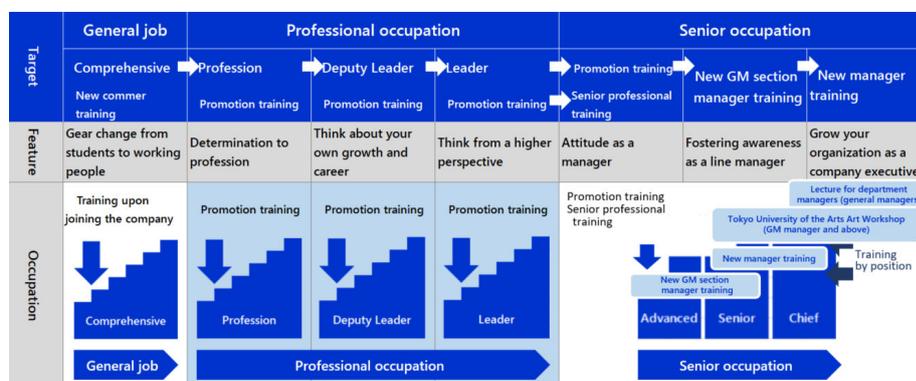

To such ends, the training enlists a curriculum that extensively delves into studies of fundamental knowledge necessary for management personnel.

As a manager, it is a curriculum to deepen and learn business perspectives such as business segment coordination, company-wide optimization to maximize value, BS/PL balance, and multi-stakeholders. In addition, at an external business school (Nomura Management School) supported by the Company, members selected from senior management participate in exchange meetings with executive members dispatched from companies representing Japan to improve management ability.

In the selection training for mid-career, students will leave the career development in business practice and learn advanced management knowledge and business creation process, as well as the leadership in the DX era, which is important for the growth strategy of the long-term management vision "Vision2022". We provide programs such as cross-industry exchanges with the awareness of "people who can lead customer co-creation".

Participants are selected from each level, including managers and mid-career employees, and through programs such as group training, individual work and workshops, we aim to discover problems related to NRI's management and business, and propose and implement solutions.

[Stratified program]

Human resource development program for Digital Transformation

NRI implements programs geared to developing talent that accelerates its DX (Digital Transformation) strategy, which is one of the growth strategies under its long-term management vision "Vision 2022". With the aim of strengthening the capabilities required in the DX era, such as AI, Analytics, Blockchain, user experience (UX) design, Agile, and Microservices, in addition to the conventional skill training for the year of joining the company, there is a DX skill acquisition training for each year.

These programs have a variety of business curricula that share basic knowledge and IT skills as well as hands-on know-how, modern business use cases, deep NRI-like insights, and cutting-edge business insights.

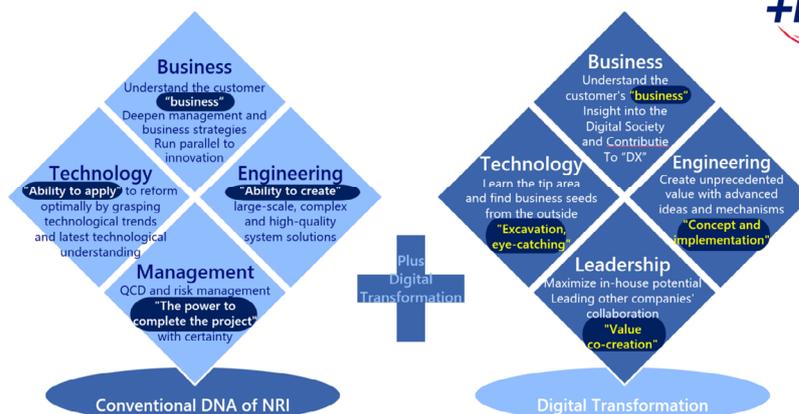

By actively collaborating with external institutions and companies such as domestic and overseas research institutions (graduate schools) and Data Scientist (DS) associations, we will incorporate a lot of academic knowledge and advanced cases and provide a more advanced learning space. We also help establish employee networks and create opportunities for success.

These programs are structured so that curriculums are planned and planned around "Learning Opportunities", "Developmental Opportunities", "Connection Opportunities", and "Opportunities for Success", so that you can get more effective skill acquisition opportunities.

In addition, we will conduct skill education for consultants and system engineers who have existing skills, expand the area of activity in the DX field while utilizing existing skills, and strategically transform into a human resources portfolio in the DX era.

[New human resource image for Digital Transformation]

Global Human Resources Development Program

NRI implements many overseas programs geared to developing business leaders who are capable of playing active roles on the global stage.

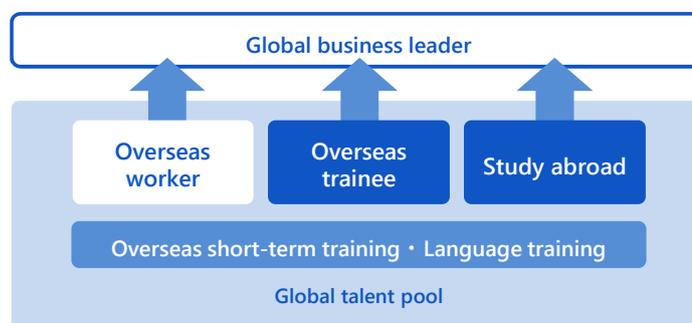

In that regard, we are particularly focusing our efforts on our overseas training system whereby we send our employees to overseas locations of our corporate customers who operate globally for periods of about one year, thereby enabling such employees to gain first-hand experience of global business. Meanwhile, we also offer overseas study programs in order to expose employees to a wide range of teachings and insights, while enabling them to gain sophisticated professional skills. Under such programs, employees learn about international standards of corporate management by acquiring MBA degrees at overseas business schools.

Opportunities to earn degrees are also popular, particularly those in computer science (MSE and MCS) and legal affairs (LLM).

Moreover, under our system of short-term training abroad and overseas foreign language study, we send employees to overseas business schools and training institutions so that they can acquire skills necessary for global business.

We also implement training in English

that involves study of project management and data science in China and India.

Business impacts

We are promoting the expansion of human resources promoting strategic fields by showing employees the image of personnel, careers, and development programs in line with the growth strategy of NRI's long-term management vision "Vision 2022".

In addition to "recruitment" as a measure of the "Human Resources/Resources Strategy" of the new medium-term management plan 2022, we will promote "employee skill change" and promote skill improvement for employees who can respond to DX strategies.

Rather than discarding and replacing the skills that employees have accumulated over the years, we have created a "+DX" concept in which new skills are added based on those skills, and a training program is prepared accordingly.

With regard to the three core issues of core human resource development, approximately 190 department managers since 2002, and approximately 90 section managers after the 2015 revision, have completed the selective development program, and have strengthened the pipeline of successor candidates.

In "DX Human Resources Development," we are strengthening strategic capabilities such as AI, analytics, blockchain and agile, and promoting the realization of growth strategies by shifting personnel to strategic priority areas.

In "Global Human Resources Development," we are promoting the expansion of NRI's global businesses by fostering global business leaders.

■ Business and Human Rights - Management Approach

S04M

Material issues of NRI related to this management approach

"Respect for human rights" and "Dialogue with civil society"

NRI's approach to material issues

We support and respect the International Code of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the Guiding Principles on Business and Human Rights, as set out in the NRI Group Policy on Human Rights.

The policy reiterates and clearly states the respect for basic labor rights and the prohibition of forced labor, child labor, discrimination, and harassment.

Furthermore, the NRI Group's "Procurement Policy of the NRI Group" declares that human rights are taken into consideration when dealing with business partners such as outsourcers and suppliers.

In addition, NRI participated in the "UN Global Compact" in May 2017 in support of four principles and ten principles of "human rights," "labor," "environment," and "anticorruption."

Under the commitment of top management, NRI is committed to acting as a good member of society and striving to achieve sustainable growth by observing and practicing the ten principles and demonstrating responsible creative leadership.

Priority activities / Medium- to long-term targets

As one of the growth strategies in the long-term management vision 'Vision 2022', NRI upholds 'Dramatic expansion of globalization', and positioned the overseas human rights issue as critical business challenge.

In FY2020, we plan to further promote the human rights due diligence we started in FY2019 and respond to identified issues.

Progress / Achievements / Challenges

In FY2018, We started to conduct human rights due diligence in Sustainability Activities Committee.

In FY2019, we promoted human rights due diligence and identified the current human rights risks of the Group.

In addition, as a company involved in the development and utilization of AI, we have established the "NRI Group AI Ethics Guidelines" intended to promote the development and utilization of AI while reducing the negative impact of AI.

In addition, we have published "Human rights report" which is summarizing our policies and initiatives concerning human rights.

► Business and human rights policy

Human rights policy

The NRI Group has established the NRI Group Policy on Human Rights and supports international human rights norms such as the "International Human Rights Bill", "The Declaration of the International Labor Organization on Fundamental Principles and Rights at Work", and "10 Principles of the United Nations Global Compact".

In addition, NRI conducts procurement activities that respect human rights, as required by the NRI Group Procurement Policy "Practice of ESG Procurement," and requests our business partners to take human rights into consideration.

NRI Group AI Ethics Guidelines

https://www.nri.com/en/sustainability/social/policies#AI_Ethics_Guidelines

► Human rights due diligence

Implementation of human rights due diligence based on the UN Guiding Principles

NRI Group has established a framework for conducting human rights due diligence, in accordance with the procedures outlined in the UN Guiding Principles for Business and Human Rights.

1. Human Rights Risk Assessment

NRI Group conducted Human Rights Risk Assessment in collaboration with Verisk Maplecroft*¹ and Caux Round Table Japan*², which provide globally generally accepted human rights risk assessment methods, and identified the potential human rights risks that NRI Group's business activities may have on human rights.

In accordance with the industry classification of Verisk Maplecroft, this human rights risk assessment covers the software & IT services industry to which the IT service business, the main business of the NRI group, belongs, and the professional services industry to which the consulting business belongs.

The report also covers all 37 countries where NRI, consolidated subsidiaries and Tier 1 suppliers are located, and has identified potential human rights risks that these industries could cause in the covered areas.

With regard to 10 human rights risk indices which selected based on their alignment to the International Labour Organisation (ILO) core labour conventions and relevance to the industries analysed, human rights risks are evaluated with a score of 0 to 10 points and are classified into four risk levels (extreme risk, high risk, medium risk, low risk).

*1 Verisk Maplecroft is a leading global risk analytics, research and strategic forecasting company.

It provides databased solutions and advice on political, human rights, economic and environmental risks to organizational resilience and sustainable procurement.

*2 Caux Round Table is a global network of business leaders aimed at ensuring business contributes to a more free, fair and transparent society. Caux Round Table Japan assists companies to promote their human rights activities.

<Scope of the assessment>

Business activities	Software & IT Services Industry: IT service business (Financial IT Solutions, Industrial IT Solutions, IT Platform Services) Professional Services Industry: Consulting business
Countries and areas	Australia, Brazil, Canada, China, Denmark, Dominican Republic, France, Germany, India, Indonesia, Ireland, Italy, Japan, Luxembourg, Malaysia, Mexico, Micronesia, Mongolia, Netherland, New Zealand, Norway, Panama, Philippines, Romania, Russia, Singapore, South Africa, South Korea, Sri Lanka, Sweden, Switzerland, Taiwan, Thailand, USE, UK, USA, Vietnam
Human Rights Indices	Child labour, Decent wages, Decent working time, Discrimination in the workplace, Modern slavery, Occupational health and safety, Right to privacy, Freedom association and collective bargaining, Indigenous Peoples rights, Land property and housing rights

<Identified Human Rights Risks>

Right to privacy

- It was identified as "extreme risk" in 8 countries/regions and "high risk" in 8 countries/regions as human rights risk related to Software & IT Services Industries.
- It was identified as "high risk" in 4 countries/regions as human rights risk related to Professional Services Industry. (Major stakeholder groups related: customers, communities)

Decent wages

- It was identified as "high risk" in 14 countries/regions as human rights risk related to Software & IT Services Industries. (Major stakeholder groups related: Employees, Suppliers' employees)

Decent working time

- It was identified as "high risk" in 5 countries/regions as human rights risk related to Professional Services Industry. (Major stakeholder groups related: Employees, Suppliers' employees)

2. Human rights impact assessment

In response to the potential risk assessment results, we have begun to grasp the actual situation for NRI and its group companies and business partners in FY2019.

In order to understand the actual situation, various types such as the ICT Sector Guide on Implementing the UN Guiding Principles on Business and Human Rights of the European Commission and the CSR Procurement Self-Assessment Tool Set of the Supply Chain Subcommittee of global Compact Network Japan The survey contents and methods are formulated with reference to the guidelines.

We are also reviewing the survey contents and methods by promoting an understanding of the laws and regulations of each country and region and the internal and external environment.

In the future, we will continue to conduct surveys to understand the actual situation, review human rights themes, and address the risks discovered.

<Contents of understanding the actual situation>

- Status of each country/region: Laws applicable in each country/region, human rights issues and topics in each country/region, etc.
- Human rights/labor: Respect for human rights, discrimination, child labor, forced labor, wages, working hours, inhumane behavior, dialogue/consultation with employees, hotline status, worker privacy, etc.
- Safety and health: workplace safety and health, emergency response, occupational accident status, etc.
- Human rights in business: Relationship with contractors, possibility of human rights violations through business (possibility of privacy infringement, etc.)
- Others: Awareness of issues related to business and human rights, opinions on our company, etc.

<Identification of human rights themes>

We believe that the NRI Group's priority human rights themes are "Decent Work," "Privacy and Data Security," and "diversity".

The basis is the NRI Group's corporate philosophy, vision, potential human rights risk assessment results, and communication with group companies and business partners.

Looking to the future, we will continue to study and act on ways to respect human rights regarding these human rights themes, not only for the NRI Group but also for the business impact of our business partners and other supply chains.

On the other hand, in the midst of changes in the business and human rights environment, it is envisaged that we will make appropriate reviews based on the results of our understanding of the actual situation of human rights risk, dialogue with stakeholders both inside and outside the company, the environment, stakeholders and rights holders.

Decent Work

- Realization of work styles that are healthy and rewarding
- Realization of proper working hours and wages

Privacy and Data Security

- Realization of privacy protection that properly handles privacy information and protects personal dignity
- Realization of respect for human rights in line with technological evolution representing AI

Diversity

- Realization of an environment in which human resources of diverse backgrounds can play active roles without any discrimination or harassment

Engagement on human rights

System for responding to consultations and reports for employees, temporary employees and partner comp

We publish our human rights initiatives on our website and in our reports.
 We published the "Human Rights Report" in FY2019, which summarizes our policies and efforts concerning human rights.
 This report was prepared with reference to the UN Guiding Principles Reporting Framework, which is a comprehensive guideline for reporting on the response of companies to human rights issues.

Response to consultation and report on human rights

System for responding to consultations and reports for employees, temporary employees and partner company employees

For NRI Group employees, temporary employees, and partner company employees, in the unlikely event that their own human rights or those of someone else have been compromised, or if they notice there may be the risk of the same, there are both internal and external reporting desks available, the contact details for which can be checked on the intranet at any time.
 In addition, we strive to keep employees informed by including training when joining the company and in the "NRI Group Rulebook Basic Rules for Executive Officers and General Employees" distributed annually. Furthermore, temporary employees and employees from partner companies who work at NRI Group offices (outside contractors) are provided with an explanation and materials indicating that there is a reporting desk when they first start work.
 Regarding consultations and reports, we will promptly investigate the facts and respond to them to prevent the recurrence of the situation.

Applicable scope

NRI Group employees, temporary staff, partner companies (outside contractors) employees

Business and Human Rights - Data

System for responding to external consultations and reports (suppliers, local communities, other)

	<p>We have not set up a contact point specializing in human rights complaints against the NRI Group. However, the representative telephone numbers and e-mail addresses that accept general inquiries are open to the public, and the relevant departments will respond through the public relations department of each company.</p>
Applicable scope	All stakeholders except NRI Group employees, temporary staff, partner companies (outside contractors) employees

Freedom of association and the right to collective bargaining

Dialogue with labor union

	<p>NRI has a union shop contract with the Nomura Research Institute Labor Union. Through collective bargaining and social gatherings, NRI frequently discusses various issues with unions, such as the economic benefits of union members, personnel systems, and working environment. The results of the "Employee Attitude Survey" conducted by the labor union every year and the problems revealed during the discussions at the labor union branch meetings and seminars will be reported to the NRI management and will be utilized in the formulation of measures.</p>

Engagement on human rights

Stakeholder dialogue

	<p>Every year NRI holds dialogues with experts and strives to grasp ESG risks including human rights risk related to the business activities of the NRI Group. In FY2019, we held dialogues with world-renowned ESG investors and sustainability experts in Japan and overseas. In this dialogue, NRI was pointed out human rights risks to consider, such as digital rights, workers' rights, discrimination on gender or nationality, supply chain human rights, and community impacts. NRI intend to identify specific human rights risks, evaluate and respond to them.</p>
Reference	<p>Stakeholder Dialogues https://www.nri.com/en/sustainability/management/dialogue</p>

Multi stakeholder engagement

	<p>Since FY2012 we have taken part in the Stakeholders Engagement Program (Human Rights Due Diligence Workshop) organized by the Caux Round Table Japan.</p> <p>We are committed to keeping ourselves informed on human rights issues through dialogues with multi-stakeholders including companies, NGOs and NPOs, and industry and academic experts.</p>
Issues raised	<p>Key human rights issues for the ICT sector (extract)</p> <ul style="list-style-type: none"> • The potential for employees to work long hours and / or unpaid overtime when working on developing information systems • The potential threat from service shutdowns to users' activities and daily lives • The potential for damage to people's privacy from personal data breaches • The potential for damage to people's personal rights from malicious websites and / or information and communications technologies (ICT) • The risk of being unable to resist state demands to hand over personal information • The potential risk in overseas business activities of bribery and corruption involving government officials • Environmentally sensitive usage of energy and water • Exerting a positive influence on improving people's lives by bridging the information divide between communities

■ Corporate Citizenship - Data

▶ Corporate citizenship policy

Corporate citizenship policy

As a overall stakeholder representatives, companies must utilize resources such as people, technology and finance to contribute to the development of local as well a larger communitites in society. NRI positions business activities and social contribution activities as comprehensive activities to realize the corporate philosophy of "pioneering the future."
And we have established "human resource development", "society development" and "information dissemination" as priority areas for social contribution activities, and we are engaged in various activities utilizing human resources and technology.

▶ Focus areas of corporate citizenship activities

Focus areas of corporate citizenship activities 1

Human resources development for the next generation

Relevance to business

Human resource development for the next generation is an activity that can utilize the internal resources of NRI's professional human resources, and at the same time, is an essential activity to realize NRI's corporate philosophy, "Dream up the future".

In order to realize the NRI Group's corporate philosophy, "Developing Dreams," we believe that it is important to develop young human resources who will lead the next generation and have a ripple effect on future communities.

The NRI Group develops various activities utilizing our know-how in providing a wide range of people such as elementary school students, university students, and international students with a place to think about the future through educational programs, dialogues, and essay contests.

In addition, we are working to collaborate with educational institutions, including accepting lectures and lectures by employees at universities and training of teachers at private companies.

Business benefits

Increase brand power and reputation: By maximizing the strengths of our Personal Development, we will improve our brand power as a think tank, which will lead to high praise from students and recruitment of excellent human resources.

We hold a dialogue with students every year as a KPI to measure the evaluation of NRI by students.

Social benefits

We have set the transition in the number of student program participants as KPIs for evaluating the social effects of human resource development.

The NRI Student Essay Contest has been held since 2006 as one of the major student programs.

This program was started with the aim of giving the younger generation, who will be responsible for the future of society, an opportunity to focus on the future of Japan and the world.

By widely disclosing the proposals won in this contest to the public, a wide range of generations, including young people, are provided with an opportunity to think about the future of Japan and the world.

The number of paper submissions in 2019 was 2,300 (59% increase from the previous year), and the cumulative number of submissions since 2006 was 17,882.

In addition, another student program, "Career Education Support," which provides students with opportunities for ICT education, reached 704 participants in 2019.

Focus areas of corporate citizenship activities 2

Social development

Relevance to business

Supporting economic and social development in emerging and developing countries and reconstruction support for local communities aiming at recovery from natural disasters such as earthquakes are important elements for realizing a sustainable society.

The consulting function, which is one of the NRI Group's powerful resources, supports the development of emerging countries and the reconstruction of the earthquake.

We are also supporting the development of local communities by utilizing the IT solution function, which is another powerful resource.

Furthermore, contributing to the local community through social contribution activities is also an important activity.

Business benefits

Social contribution activities related to social development lead to consulting and IT solutions businesses related to local community reconstruction support and development support in emerging and developing countries, and generate revenue.

The results of that activity can be measured on an individual project basis.

Social benefits

One of the results of social development is the donations to victims of natural disasters.

A total of 9,774 NRI Group employees will contribute to the recovery efforts for the Great East Japan Earthquake in March 2011, for a total of 253 million of yen, including matching gifts from NRI.

A total of 2,350 NRI Group employees contributed to the 2016 Kumamoto Earthquake recovery efforts, for a cumulative total of 35 million of yen including matching gifts from NRI.

For the victims of the heavy rain disaster in July 2018, 626 group employees donated a total of 5 million yen.

■ Corporate Citizenship - Data

Focus areas of corporate citizenship activities 3

	Information communication
Relevance to business	<p>Publication of investigation and research activities outcome is indispensable, for disseminating the social innovation that NRI promotes and receiving recognition widely from the society.</p> <p>Since our foundation, we have undertaken investigation and research activities in diverse fields.</p> <p>We use the results of these activities in our business and continue to disseminate them through regular publications, reports, books, forums and other events.</p>
Business benefits	<p>By continuing to disseminate information through forums and events, NRI's reputation as a think tank will increase, leading to cutting-edge innovation-related projects.</p> <p>The result can be measured by research and development expenses as innovation investment.</p>
Social benefits	<p>As a KPI to evaluate the social effect of information transmission, we have set the transmission transition for each information transmission medium.</p> <p>In FYI 2019, the information dissemination record was 21 books, 290 newspaper and magazine articles, 911 lectures, 155 television and radio appearances, and 80 news releases.</p>

Translation

The following is an English translation of an independent assurance report prepared in Japanese and is for information and reference purposes only. In the event of a discrepancy between the Japanese and English versions, the Japanese version will prevail.

Independent Assurance Report

July 28, 2020

TO:

Mr. Shingo Konomoto
Chairman and President & CEO
Nomura Research Institute, Ltd.

Kenji Sawami
Engagement Partner
Ernst & Young ShinNihon LLC
Tokyo, Japan

We, Ernst & Young ShinNihon LLC., have been commissioned by Nomura Research Institute, Ltd. (hereafter the "Company") and has carried out a limited assurance engagement on the environment and society data and indices (hereafter the "Indicators") of the Company and its major subsidiaries and Yokohama Center (Yokohama Nomura Building) for the year ended March 31, 2020 as included in "Disclosure of Sustainability Information" on the Company's ESG Databook 2020 (hereafter the "Report"). The scope of our assurance procedures was limited to the Indicators marked with the symbol "✓" in the Report.

1. The Company's Responsibilities

The Company is responsible for preparing the Indicators in accordance with the Company's own criteria, that it determined with consideration of Japanese environmental regulations as presented in the Data in III. Method of Calculation on Scope of Data Collection and Method of Calculation for Key Sustainability Performance Indicators. Greenhouse gas (GHG) emissions are estimated using emissions factors, which are subject to scientific and estimation uncertainties given instruments for measuring GHG emissions may vary in characteristics, in terms of functions and assumed parameters.

2. Our Independence and Quality Control

We have met the independence requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is based on the fundamental principles of integrity, objectiveness, professional competence and due care, confidentiality, and professional behavior.

In addition, we maintain a comprehensive quality control system, including documented policies and procedures for compliance with ethical rules, professional standards, and applicable laws and regulations in accordance with the International Standard on Quality Control 1 issued by the International Auditing and Assurance Standards Board.

3. Our responsibilities

Our responsibility is to express a limited assurance conclusion on the Indicators included in the Report based on the procedures we have performed and the evidence we have obtained.

We conducted our limited assurance engagement in accordance with the *International Standard on Assurance Engagements: Assurance Engagements Other than Audits or Reviews of Historical Financial Information* ("ISAE 3000") (Revised), and with respect to GHG emissions, the *International Standard on Assurance Engagements: Assurance Engagements on Greenhouse Gas Statements* ("ISAE 3410"), issued by the International Auditing and Assurance Standards Board.

The procedures, which we have performed according to our professional judgment, include inquiries, document inspection, analytical procedures, reconciliation between source documents and Indicators in the Report, and the following:

- Making inquiries regarding the Company's own criteria that it determined with consideration of Japanese environmental regulations, and evaluating the appropriateness thereof;
- Inspecting relevant documents with regard to the design of the Company's internal controls related to the Indicators, and inquiring of personnel responsible thereof at the Company, Data Centers (2 centers) and Yokohama Center visited;
- Performing analytical procedures concerning the Indicators at the Company, Data Centers (2 centers) and Yokohama Center visited;
- Testing, on a sample basis, underlying source information and conducting relevant re-calculations at the Company, Data centers (2 centers) and Yokohama Center visited;

The procedures performed in a limited assurance engagement are more limited in nature, timing and extent than a reasonable assurance engagement. As a result, the level of assurance obtained in a limited assurance engagement is lower than would have been obtained if we had performed a reasonable assurance engagement.

4. Conclusion

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Indicators included in the Report have not been measured and reported in accordance with the Company's own criteria that it determined with consideration of Japanese environmental regulations.

NRI's sustainability information disclosure is prepared in accordance with the Core option of the Global Reporting Initiative (GRI) Sustainability Reporting Standards.

206 : Anti-competitive behavior			
206-1	Legal actions for anti-competitive behavior, anti-trust, and monopoly practices	ESG Databook 2020 - Compliance - Fair competition	p.31
300 : Environmental		Reference	Page no.
301 : Materials			
301-1	Materials used by weight or volume	ESG Databook 2020 - Resource use, Waste - Paper resources	p.75
301-2	Recycled input materials used	–	
301-3	Reclaimed products and their packaging materials	–	
302 : Energy			
103	Management Approach	ESG Databook 2020 - Environmental Management - Management Approach	p.65
302-1	Energy consumption within the organization	ESG Databook 2020 - Energy Consumption - Energy consumption	p.74
302-2	Energy consumption outside of the organization	–	
302-3	Energy intensity	–	

302-4	Reduction of energy consumption	ESG Databook 2020 - Energy Consumption - Energy consumption	p.74
302-5	Reductions in energy requirements of products and services	ESG Databook 2020 - Climate Change - Action to mitigate climate change	p.72
303 : Water			
303-1	Water withdrawal by source	ESG Databook 2020 - Resource use, Waste - Water resources	p.75
303-2	Water sources significantly affected by withdrawal of water	Not applicable	
303-3	Water recycled and reused	ESG Databook 2020 - Resource use, Waste - Water resources	p.75
304 : Biodiversity			
304-1	Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	Not applicable	
304-2	Significant impacts of activities, products, and services on biodiversity	Not applicable	
304-3	Habitats protected or restored	Not applicable	
304-4	IUCN Red List species and national conservation list species with habitats in areas affected by operations	Not applicable	
305 : Emissions			
103	Management Approach	ESG Databook 2020 - Environmental Management - Management Approach	p.65
305-1	Direct (Scope 1) GHG emissions	ESG Databook 2020 - Greenhouse Gas Emission - Greenhouse gas emissions	p.73
305-2	Energy indirect (Scope 2) GHG emissions	ESG Databook 2020 - Greenhouse Gas Emission - Greenhouse gas emissions	p.73
305-3	Other indirect (Scope 3) GHG emissions	ESG Databook 2020 - Greenhouse Gas Emission - Greenhouse gas emissions	p.73
305-4	GHG emissions intensity	–	
305-5	Reduction of GHG emissions	ESG Databook 2020 - Greenhouse Gas Emission - Greenhouse gas emissions	p.73
305-6	Emissions of ozone-depleting substances (ODS)	Not applicable	
305-7	Nitrogen oxides (NOX), sulfur oxides (SOX), and other significant air emissions	Not applicable	
300 : Environmental		Reference	Page no.
306 : Effluents and waste			
306-1	Water discharge by quality and destination	ESG Databook 2020 - Resource Use, Waste - Water resources	p.75
306-2	Waste by type and disposal method	ESG Databook 2020 - Resource use, Waste - Waste	p.75
306-3	Significant spills	ESG Databook 2020 - Environmental Management - Environmental management system	p.67
306-4	Transport of hazardous waste	Not applicable	
306-5	Water bodies affected by water discharges and/or runoff	Not applicable	
307 : Environmental compliance			
103	Management Approach	ESG Databook 2020 - Environmental Management - Management Approach	p.65
307-1	Non-compliance with environmental laws and regulations	ESG Databook 2020 - Environmental Management - Environmental management system	p.67
308 : Supplier environmental assessment			
103	Management Approach	ESG Databook 2020 - Supply Chain Management - Management Approach	p.33
308-1	New suppliers that were screened using environmental criteria	ESG Databook 2020 - Supply Chain Management - Supplier screening criteria	p.37

308-2	Negative environmental impacts in the supply chain and actions taken	–	
400 : Social		Reference	Page no.
401 : Employment			
103	Management Approach	ESG Databook 2020 - Labor Practice, Diversity - Management Approach	p.77
401-1	New employee hires and employee turnover	ESG Databook 2020 - Labor Practice, Diversity - Hire and turnover	p.84
401-2	Benefits provided to full-time employees that are not provided to temporary or part-time employees	–	
401-3	Parental leave	ESG Databook 2020 - Labor Practice, Diversity - Work-life balance	p.87
402 : Labor/Management relations			
402-1	Minimum notice periods regarding operational changes	–	
403 : Occupational health and safety			
103	Management Approach	ESG Databook 2020 - Occupational Health and Safety - Management Approach	p.90
403-1	Workers representation in formal joint management–worker health and safety committees	ESG Databook 2020 - Occupational Health and Safety - Occupational health and safety	p.92
403-2	Types of injury and rates of injury, occupational diseases, lost days, and absenteeism, and number of work-related fatalities	ESG Databook 2020 - Occupational Health and Safety - Occupational health and safety	p.92
403-3	Workers with high incidence or high risk of diseases related to their occupation	ESG Databook 2020 - Occupational Health and Safety - Occupational health and safety	p.92
403-4	Health and safety topics covered in formal agreements with trade unions	ESG Databook 2020 - Occupational Health and Safety - Occupational health and safety	p.92
404 : Training and education			
103	Management Approach	ESG Databook 2020 - Human Resources Development - Management Approach	p.97
404-1	Average hours of training per year per employee	ESG Databook 2020 - Human Resources Development - Inputs for human resources development	p.108
404-2	Programs for upgrading employee skills and transition assistance programs	ESG Databook 2020 - Human Resources Development - Human resources development program	p.101
404-3	Percentage of employees receiving regular performance and career development reviews	–	
405 : Diversity and equal opportunity			
103	Management Approach	ESG Databook 2020 - Labor Practice, Diversity - Management Approach	p.77
405-1	Diversity of governance bodies and employees	ESG Databook 2020 - Corporate Governance - Members of the Board	p.10
		ESG Databook 2020 - Labor Practice, Diversity - Employee data, Employment of persons with disabilities	p.80
405-2	Ratio of basic salary and remuneration of women to men	–	
406 : Non-discrimination			
406-1	Incidents of discrimination and corrective actions taken	–	

400 : Social			
		Reference	Page no.
407 : Freedom of association and collective bargaining			
407-1	Operations and suppliers in which the right to freedom of association and collective bargaining may be at risk	–	
408 : Child labor			
408-1	Operations and suppliers at significant risk for incidents of child labor	–
