ESG Briefing
Environmental and Social Activities
in the NRI Group

Feb. 21, 2019

Senior Corporate Managing Director
Nomura Research Institute

Kenji Yokoyama
Contents

1. Approach to environmental and social activities in the NRI Group

2. Environmental and social activities in the NRI Group
1. Approach to environmental and social activities in the NRI Group

Approach to the environment and society

- Engage in activities that are suitable for our aspirations as a global company
- Execute measures that are practical and NRI-like
- Work cooperatively with our employees, executives, and business partners
1. Approach to environmental and social activities in the NRI Group

Seek NRI-like environmental and social activities that fit the nature of our business

Consolidated sales
421.4 billion yen

- Consulting services 17%
- IT solutions services 83%

Greenhouse gas emissions
75k t-CO₂

- Offices 29%
- Data centers (five) 71%

There are approximately 13,000 group employees (30% of whom are overseas) at 42 business sites in 14 countries and regions

- The spirit of our corporate philosophy “Dream up the future”
- Consulting x IT solutions
- Contributing to future society via social recommendations, system proposals, etc.
- Creating business IT
- Developing systems that serve as social infrastructure
- Providing joint-use services
- Expanding our global business
- Managing according to global standards

Environmental initiatives

Elephant sculptures in the 1st floor lobby at the Yokohama Center (Charity art for the conservation of Asian elephants)

Cold water vertical heat storage tank at Tokyo Data Center 1

The energy-conserving Yokohama Center which received proceeds from sales of green bonds, and a monument commemorating the issuance of green bonds

NRI-EMS operations audit

Forest development program in Tadami, Fukushima Prefecture
2. Environmental and social activities in the NRI Group

Commitment to decarbonization as an IT business operator by registration in the SBT initiative and membership in the RE100

- Drafted environmental targets to achieve the goal of 2°C, which were approved for registration by the SBT (Science-Based Targets) Initiative*1
- Also joined RE100*2, aiming for zero carbon emissions in FY2050

<table>
<thead>
<tr>

2. Environmental and social activities in the NRI Group

NRI declares its support for the TCFD

About the TCFD (Task Force on Climate-related Financial Disclosures)

- Established by the Financial Stability Board (FSB) at the request of G20 finance ministers
- Requests climate-related disclosures from companies, such as the financial impact of climate change according to scenario analysis, so that investors can make appropriate investment decisions

Items recommended for disclosure by the TCFD

<table>

2. Environmental and social activities in the NRI Group

This fiscal year we identified our anticipated climate-related risks and opportunities

This fiscal year we took inventory of climate-related risks and opportunities in multiple scenarios, and identified the anticipated impact.

Set the scope to be studied

- Review our own enterprise

Study the scenarios

- Refer to scenarios such as IEA*3 and IPCC*4, as well as scenarios of other companies

Identify impact

- Identify the anticipated risks and opportunities

Next fiscal year onward

- Disclose results of studies in integrated reports
- Analyze the identified risks and opportunities in detail

In addition to data centers, also consider impact from clients and other sources

Set up 2°C and 4°C scenarios

Anticipate risks and opportunities in each different segment

# 2. Environmental and social activities in the NRI Group

## Referring to the IEA and IPCC, we used 2 °C and 4 °C scenarios

<table>
<thead>
<tr>
<th>2 °C Scenario</th>
<th>4 °C Scenario</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Preconditions</strong></td>
<td><strong>Preconditions</strong></td>
</tr>
<tr>
<td>✓ Policies such as carbon taxes ($75-100/ton of CO2) will be implemented and regulations tightened to control emissions</td>
<td>✓ Strict policies will not be implemented to control emissions, nor will regulations be tightened</td>
</tr>
</tbody>
</table>

### Anticipated changes

<table>
<thead>
<tr>
<th>Expansion of renewable energy</th>
<th>More extremely hot days</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Renewable energy comprises approx. 36% of electricity generated (also approx. 47% worldwide)</td>
<td>• Temperatures go from reaching record highs around once every 20 years to once every 3 years* (in 2046)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Escalating electricity costs</th>
<th>Greater frequency of torrential rain</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Electricity costs rise as much as 28% (Japan)</td>
<td>• Average daily rainfall goes from reaching record highs around once every 20 years to once every 10 years* (in 2046)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Spread of energy conservation</th>
<th>Extreme increase in tide levels, increase in the average time level</th>
</tr>
</thead>
<tbody>
<tr>
<td>• World energy efficiency improves by an average of 3.2% annually</td>
<td>• Extremely high tides occurred even at the start of the 21st century</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Growth of low-carbon products and services</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Low-carbon products and services become cost-competitive</td>
<td></td>
</tr>
</tbody>
</table>

</table>
Conducting human rights due diligence based on the UN Guiding Principles

NRI conducts human rights due diligence according to the UN Guiding Principles on Business and Human Rights, and publishes the results and responses in reports, etc.

We also properly address laws and regulations that must be observed such as Australia’s Modern Slavery Act.

Our human rights due diligence cycle

- Use report forms and other methods to report assessment results and response status
- Submit the required statements, such as for Australia’s Modern Slavery Act
- Ongoing follow-up assessments of response status, and additional responses as needed
- Review human rights issues from the perspective of the NRI Group according to world and business circumstances
- Human rights risk assessments
- Human rights impact assessments (conducted particularly in regions likely to be high risk)
- Dialogue with stakeholders
- Specific initiatives to mitigate risks and reduce negative effects based on assessment results
2. Environmental and social activities in the NRI Group

Transparent disclosures that are responsive to trends in ESG investment

- Disclosing integrated financial and non-financial information to improve corporate value in the medium to long term

<table>

## (Reference) ESG indexes that have selected NRI

<table>
<thead>
<tr>
<th>Index</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Dow Jones Sustainability World Index</strong>&lt;br&gt;The Dow Jones Sustainability Index is the world’s first ESG stock index, jointly developed by S&amp;P Dow Jones Indices, United States and RobecoSAM, Switzerland. The index evaluates companies in terms of economic, environmental, and social factors, and selects those with superior sustainability as its constituent stocks. DJSI World evaluates the top 2,500 companies by market capitalization in the world. NRI has been selected as a constituent stock since 2018.</td>
<td><strong>FTSE Blossom Japan Index</strong>&lt;br&gt;Developed by FTSE Russell of the London Stock Exchange Group of companies, this index is comprised of Japanese companies that display high ESG performance. NRI has been selected for inclusion in the index for two consecutive years since 2017.</td>
</tr>
<tr>
<td><strong>Dow Jones Sustainability Asia Pacific Index</strong>&lt;br&gt;The Dow Jones Sustainability Index is the world’s first ESG stock index, jointly developed by S&amp;P Dow Jones Indices, United States and RobecoSAM, Switzerland. The index evaluates companies in terms of economic, environmental, and social factors, and selects those with superior sustainability as its constituent stocks. DJSI Asia Pacific chooses from among the top 600 companies by market capitalization in the Asia-Pacific Region. NRI has been selected for inclusion in the index for three consecutive years since 2016.</td>
<td><strong>S&amp;P/JPX Carbon Efficient Index</strong>&lt;br&gt;Developed by S&amp;P Dow Jones Indices of the US, this environmental index heavily weighs constituent stocks of highly carbon-efficient companies that sufficiently disclose carbon emissions-related information. NRI was selected for inclusion in the index starting in 2018.</td>
</tr>
<tr>
<td><strong>FTSE4Good Developed Index</strong>&lt;br&gt;This index was developed by FTSE, a subsidiary of the London Stock Exchange. It was created to recognize corporate activities that meet internationally accepted corporate responsibility standards, and promote investment in those companies. NRI has been selected for inclusion in the index for 13 consecutive years since 2006.</td>
<td><strong>MSCI ACWI ESG Leaders Index</strong>&lt;br&gt;(Previously: MSCI Global Sustainability Indexes)&lt;br&gt;This index developed by US company MSCI is comprised of companies that have earned strong reputations in ESG. NRI has been included among the stocks in the index for three consecutive years since 2016.</td>
</tr>
<tr>
<td><strong>MSCI Japan ESG Select Leaders Index</strong>&lt;br&gt;This index developed by MSCI of the US selects companies with relatively high ESG (Environmental, Social, Governmental) ratings in each industry type from among the top 500 companies in Japan by market capitalization. NRI has been selected for inclusion in the index for two consecutive years since 2017.</td>
<td><strong>MSCI Japan Empowering Women Index (WIN)</strong>&lt;br&gt;This index developed by MSCI of the US scores companies in a multifaceted manner according to data on the employment of women disclosed according to the Act on Promotion of Women’s Participation and Advancement in the Workplace and disclosures by companies, and selects companies in each industry that recognize the advancement of women. NRI has been selected for inclusion in the index for two consecutive years since 2017.</td>

Dream up the future.
Explanations of terms

*1 SBT (Science-Based Targets) Initiative:
This initiative was established as a collaboration between four organizations, the CDP which is an institutional investor organization for promoting disclosures related to climate change measures, the United Nations Global Compact (UNGC), the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF), with the aim of working toward targets for reducing the science-based greenhouse gas emissions of companies in order to keep the global temperature increase below 2°C compared to pre-industrial revolution temperatures. The NRI Group was the 132nd company globally to have environmental targets registered by the SBT Initiative, and was the 29th from Japan.

*2 RE100:
RE100 is a global initiative managed by international NGO The Climate Group (*1) in partnership with CDP (*2). Member companies commit to sourcing 100% of the energy for their business activities from renewable sources, and announce this commitment. The NRI Group was the 165th company globally to become a member of the RE100, and was the 17th from Japan.

*1 The Climate Group: An international NGO with offices in London, New Delhi, and New York. Its mission is to promote measures against climate that limit global warming to no more than 1.5°C. The group leverages its powerful networks of businesses and government agencies which shift global markets and policies to further accelerate action against climate change.

*2 CDP: An international non-profit organization (NPO) which leads companies and government agencies toward reducing greenhouse gas emissions and the protection of water resources and forests. Supported by investors with assets in excess of 87 trillion US dollars, the CDP runs an environmental info disclosure system used by large numbers of companies and cities, and provides data analysis and expert knowledge throughout the world.

*3 IEA (International Energy Agency):
This organization was founded in 1974 to help countries collectively respond to energy disruptions, and currently has 36 member countries. The IEA promotes energy-related cooperation between countries and publishes reports that analyze long-term energy forecasts and predictions related to energy. It has publicized multiple scenarios such as the Sustainable Development Scenario which is recognized internationally as the 2°C scenario.

*4 IPCC (Intergovernmental Panel on Climate Change):
The IPCC is a panel of 195 member countries and regions which was established in 1988 by the United Nations Environment Programme and World Meteorological Organization to provide scientific assessments on climate change and think of a scientific basis for decisions by policymakers. Every five to seven years it assesses scientific knowledge pertaining to the climate change occurring during that time and publishes the IPCC Assessment Report. The Fifth Assessment Report published in 2014 points out four different scenarios, ranging from the RCP 2.6 scenario which anticipates temperature increases of around 2°C, to the RCP 8.5 scenario which anticipates temperature increases of around 4°C.

*5 WBCSD (World Business Council for Sustainable Development):
The WBCSD is a global CEO-led organization based in Geneva, Switzerland that was founded in 1995 and seeks to achieve a sustainable future. Currently with around 200 member businesses (of which 20 are Japanese), it exercises leadership toward the world while providing effective recommendations.
